THE LIGHTING BIBLE® 14

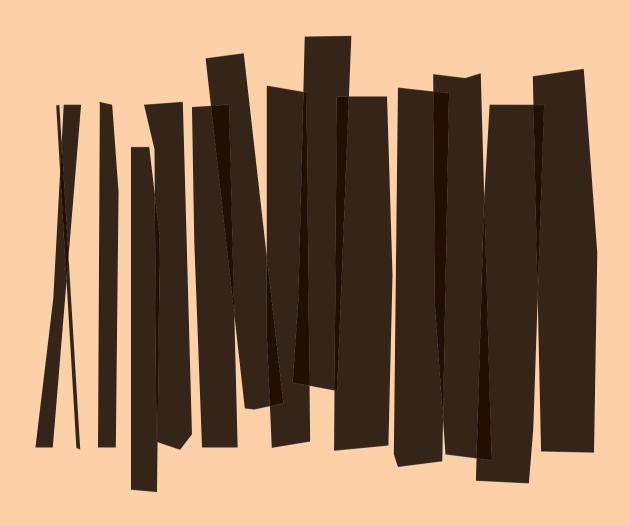

The Lighting Bible 14 – IMAGINE, invites you on a journey of inspiration.

A world of wonder to explore new ideas and an escape into enlightenment.

Abundantly illustrated with breathtaking photography of architectural realisations from across the globe, The Lighting Bible 14 – Imagine, represents our craft, where we dream up a world of light.

You will find plenty of information about our collection of architectural lighting solutions throughout these pages. Are you looking for in-depth technical product details?

Extensive product information can be found throughout our website. deltalight.com offers you complete, up to date product information at your fingertips.

The Lighting Bible 14 is available in two editions.

Imagine invites you to enter a world of imagination, whilst **The Lighting Bible 14 – CREATE**, celebrates the products that make up the Delta Light collection. With detailed product photography and comprehensive product information, the focus is on application and creation.

Would you like to order a copy of The Lighting Bible 14 – Create?

Head over to **deltalight.com/14** to request your copy today.

## PURE LIGHTING PLEASURE.

☑ DELTALIGHT®

Purity is key in our latest edition of The Lighting Bible. Deep in the core of our DNA is the mission for Pure Lighting Pleasure.

The Lighting Bible 14 brings you a collection of pure lighting experiences with a language of its own to enhance the human experience of architecture and nature. Our luminaires offer the building blocks for unique creations of brightness, atmosphere, and emotion.

Sophistication in technology and purity in design unite in our collection. We offer lighting that pushes the boundaries of technology and engineering whilst bringing a feeling of comfort, elegance, excitement and purity. Explore our complete collection of lighting solutions and experience pure lighting pleasure.

# WE MAKE LIGHT

Jan, Paul & Peter Ameloot

#### WE MAKE LIGHT

We develop lighting solutions to improve people's quality of life. We offer our lighting expertise to architects, interior designers and lighting designers, to help them realise their vision and create a lighting scenography that integrates into the architecture. Using the right lighting, in the right way, enhances and complements architectural concepts. We strive to be the very best in everything we do. With our extensive experience in product development, manufacturing, and design since 1989, we approach the future with ambition and confidence. We continuously invest in people, new markets, production technologies and our infrastructure - to improve our service capabilities, expand our R&D department, test facilities and laboratory, increase the level of warehouse automation and expand the House of Light training centre. As a family business, we are happy to share our passion, creativity, and dedication. Our aim is to inspire people all over the world. As a family, we have a personal stake in making your project a success.

#### PAUL AMELOOT

Entrepreneur Visionary Designer

Paul Ameloot created Delta Light in 1989 in the Belgian city of Roeselare, realising his dream to design and manufacture architectural lighting. The local success story soon went global, with the participation in international events from the get-go. Today Delta Light is active on all continents, while still honouring our local roots. "I started out designing and developing all products myself. Even though today we have a team of 35 engineers, I still contribute my vision and ideas. Because once a player, it's hard to become a fan, sitting on the bench and watching the game. My dream really came true, not to forget, together with my wife Katrien. Our sons, Peter and Jan, continue to make that dream grow."

# WE ARE DELTA LIGHT

## IN-HOUSE DESIGN

The lighting industry is constantly evolving, providing both challenge and opportunity. It fascinates us to keep on bringing **new designs and lighting solutions** to the market. You could consider it a passion to continuously surprise and inspire people with new lighting languages.

An essential attribute in Delta Light's creative process is the extensive in-house design, development, testing, engineering, and manufacturing of all products. This enables us to achieve our short idea-to-market philosophy, resulting in extensive new collections being launched on a regular basis.

Our in-house design team crafts cuttingedge lighting solutions, that combine an architectural design language, a minimalist approach, and a boldness that challenges the boundaries of technology. In-house design is the foundation of our product portfolio, but we also love to collaborate with architects and designers, from different industries to create and innovate.

Delta Light's extensive design and R&D teams are constantly discovering future trends, both in terms of design and use of materials, whilst remaining focused on **the power of imagination**. Its creative statement is supported by the opinion of expert panels, resulting in prestigious awards for our collection of products, including IF Design Award, Good Design Award, Red Dot Design Award plus many more..

We are focused on the detail. The looks, how a fixture moves, how it can be specified and installed, the ease of enjoying the light and so much more. With a surprising visual simplicity, our products are the result of extensive research and testing, fusing advanced technology with timeless design and sustainable materials.

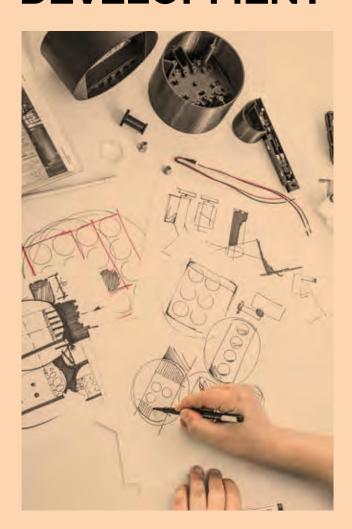

#### **CONTINUOUS RESEARCH & INNOVATION**

Delta Light has been at the forefront of lighting technology for over 30 years now, and we continue to push boundaries, both in interior and exterior lighting. Our investment in R&D, production and innovation aims to deliver outstanding luminaires, blending contemporary design with high-quality materials, advanced engineering, the very best performance and a long lifespan.

# RESEARCH & DEVELOPMENT

#### **CUTTING-EDGE LED TECHNOLOGY**

As luminaire designers and manufacturers, we always strive to create the best possible thermal conditions in the luminaire, to ensure the LEDs operate at their optimum. From the design of the LED circuit boards and heat sink, to the selection of materials, to the assembly process and installation techniques... everything is engineered to reach optimal life expectancy and maximum efficiency.

By partnering with the best LED suppliers in the world, we ensure a consistent LED selection with colour uniformity across all product ranges. A minimum of MacAdam Step 2 is standard throughout our collection, whilst many of our new collection LEDs offer MacAdam Step 1.

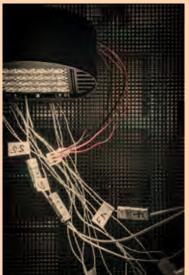

#### **CERTIFIED LABORATORY TESTING**

Product quality and safety testing within our Delta Light laboratory conform to the International Electrotechnical Commission standards. The close cooperation and CTF stage 3 acceptance with our certifying partners SGS-CEBEC and INTERTEK leads to CE, ENEC and CB certifications for European and IEC member countries www.members.iecee.org/

Our laboratory also covers the certification of products for the North American market by being certified as a level 4 satellite laboratory for INTERTEK.
This allows us to efficiently obtain the cETLus listing for our standard North American product range and provide exceptional service for even the most demanding customer specific solutions.
www.intertek.com/directories/etl-listed-mark/

#### ADVANCED OPTICS

Delta Light's team of engineers and optic experts are on a continuous quest to match the company's credo for design with energy-efficiency and optimal quality of light. Delta Light's collection is ready to meet the needs of today's architecture, interior and landscape design, and to illuminate with impact.

We offer different precision light

We offer different precision light distributions to fulfil various requirements, with high uniformity, for demanding applications. CAD-engineered and precision manufactured lenses deliver a tightly controlled light distribution. The variety of optics, beams and other features enable designers to meet the various illumination needs.

#### STATE OF THE ART DEVELOPMENT TECHNIQUES

An important feature in Delta Light's creative process is the use of state-of-the-art development techniques. The intensive use of 3D printing, early stage FMEA (Failure Mode and Effect analysis), goniophotometer measurement and an in-house third party recognised lab (SMT/CTF/satellite data acceptance) result in a fast, efficient and 'first time right' development process. As such, it is an essential attribute in the company's short idea-to-market philosophy.

Throughout the entire production process Delta Light distinguishes itself by handling **the strictest quality parameters**, to ensure products and services are designed and produced to exceed customer requirements. Every step in the production process has a routine quality procedure, covering both product quality and testing. Every single product that leaves Delta Light, has been inspected and tested thoroughly, resulting in minimal returns and maximum efficiency.

#### **HIGH-QUALITY**

Delta Light maintains the highest standards in everything we do – including in the choice of materials, the technology and the coating process. Many of our product ranges feature special coating on critical parts (e.g. screws, bolts, latches etc), combined with high-quality alloy and specialist paint.

To avoid the problem of oxidation and corrosion of outdoor products, Delta Light uses a prime selection of aluminium alloys with a low content in copper. The protection by anodizing treatment, on all suitable components including die-cast aluminium ones, improves the resistance against corrosion. The titanium-based conversion layer offers a further protective layer for protection prior to the final polyester painting.

We apply extensive pre-painting surface treatments for maximum protection against corrosion, such as acid washing to clean the surface, rinsing with demineralized water to remove residue, and the application of a chemical conversion treatment to protect against rusting.

Our polyester powder colour coating is based on saturated polyester resins, electrostatically applied and oven cured at 200°, guaranteeing high resistance to atmospheric ageing and UV light exposure. Extra resistant surface paint is guaranteed by filliform corrosion testing with an exposion of over 1500h.

All coating procedures are followed by daily careful testing. Strict controls are constantly maintained over the parameters of every step in the process, such as purity, pH, chemical concentrations, temperature, etc. This ensures the best achievable substrate penetration and uniformity of the conversion coat, thereby ensuring optimum corrosion resistance and powder-coat adhesion.

t Mallol Arquitectos / Lighting By Led Life Panama

Since our foundation in 1989 we have developed from a small Belgian company to become a global business, offering lighting solutions and services in 120 countries worldwide.

In addition to the Belgian headquarters we have Delta Light branch offices and partners on all continents and in key design capitals, from Miami to Bogota, Amsterdam to Dubai, Saint-Petersburg to Hong Kong, New York to Milan, Toronto to London and many more. Our goal is to support the international projects personally and locally.

Delta Light caters for some of the world's most well-known brands and architects, providing sophisticated and value add lighting solutions to **residential**, **office**, **hospitality**, **retail**, **landscaping**, **showroom**, **and public projects**. From small to super large scale, Delta Light has the product range, experience, and knowledge to meet the functional and aesthetic needs of your projects.

Each project requires a customised approach, and as such Delta Light recognises this with an exceptional package of services and design tools. Our global team works with all stakeholders involved to achieve the best possible results.

Starting with initial concept lighting support to the installation process and project follow-up, and everything in between. Be it for technical or application questions, performance and energy saving studies, custom designs, and made-to-measure solutions, rendering or graphics, or any other lighting support needs... Delta Light provides a one-stop-shopping solution for your projects.

# SUSTAINABILITY

We recognise that our business activities are associated with responsibility for ecological awareness and health and sustainability, and as such we treat these issues as a priority. Our quest for sustainability at Delta Light is translated in continuously striving to make our products and operations more efficient, durable and environmentally friendly. With each new collection, come new technological developments, evolutions in recyclability, and in efficiency of material use, production and transportation. These efforts have seen us win awards such as Lighting For Good Awards in 2019 and 2020.

Today we can say our production operates on a self-powered renewable energy model. Our headquarters in Belgium are equipped with solar panels that provide enough solar energy to cover the energy need of our entire production line and of the office site.

Recycling and production waste management is a key theme that is reflected in our production processes, such as our handling of aluminium scrap. Many of our luminaires are created from aluminium profiles. We optimise the usage of these profiles; however, waste is inevitable. As aluminium is 100% recyclable, all aluminium waste is collected for recycling.

At our Belgian headquarters and at our global offices we take pride in providing a healthy, safe, and balanced environment for all employees. Our efforts in sustainability and wellbeing as an employer and manufacturer have earned us a 2019 Silver Medal by the independent monitor Ecovadis.

# THINGS TO SEE.

#### CUSTOMISE YOUR SUPERLOOP PLUS

Meet the newest member of our Superloop collection. Superloop Plus features an integrated decorative panel, for you to customise. Our proposed options are light and dark grey felt in recycled PET. However, you can tailor the panel to the design of your project, in felt, leather, wood, textiles and more. Discover the unlimited possibilities.

#### **MULTINOVA** MULTI-APPLICABLE

Multinova has something familiar and something fresh at the same time. As a disc of light, Nova refers to the Supernova range, as both families share similarities in looks and ways of installation. But Multinova is slimmer and has some additional features to make it multi-applicable, hence Multi in the name.

#### ARTUUR, SOPHISTICATED DETAILS

Everything about Artuur catches the eye, be it its design, its optical compartment or its small protrusion when installed into the ceiling. Artuur adds depth into the room owing to its gentle protruding ring. Small enough to be noticed, big enough to make a difference.

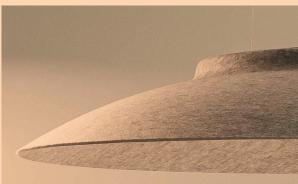

#### HALOSCAN, **DESIGN FOLLOWS OPTICS**

Designed around its flat optics, Haloscan combines ultra-minimalistic looks with a pleasurable light effect. With its different finishing colours, multiple beam angles and various installation options, Haloscan is perfect for creative compositions throughout an entire project.

#### SOLISCAPE

An extremely versatile and flexible system, specifically designed to create human-centric environments Developed together with UNStudio, Soliscape combines lighting, acoustics and IOT into an aesthetically appealing solution. Soliscape presents a toolbox with flexible components to architects and designers, to create unique constellations in human-centric environments.

#### **ZOOVER, GENTLE TEXTURES**

Zoover adds volume, depth and texture to the room. Designed as a shallow dome, Zoover has different looks depending on the point of view. Looking at it from aside, the thermoformed shell has a very neutral appearance. Only when lowering the viewpoint, more and more details catch the eye: a performant light grazing the inner dome.

#### A NEW TAKE ON SPY

In our continuous search for better user comfort with more precise optics and better light control, the complete Spy range has been upgraded. The result? Fresh shapes and additional finishing colours, better light comfort through hybrid optics, improved LED colour consistency and new perspectives with Tunable White and Soft Dim.

#### **NEXT GENERATION**

This Bible is not only filled with novelties, some longstanding Delta Light classics got upgraded too. Fresh designs, a more modern look, better CRI, new or improved optics, ... ready to shine on in the coming years. Have a look at the redesigned Kix, our upgraded Spy family, Minigrid and Deep Ringo extensions, the rebirth of Backspace and Walker, and more.

#### VISUAL COMFORT FOR OFFICES

The Lighting Bible 14 offers a whopping new array of technical architectural office lighting. Each with its own set of technological advantages and unique design language. While Inform focuses on Melanopic Light Technology (MLT), Conform by Dean Skira is equipped with Natural Light Technology (NLT). Both technologies are developed in-house and are focused on human wellbeing, to boost and support the human circadian rhythm.

#### LIGHT QUALITY OUTDOOR

Delta Light's team of engineers and optic experts is on a continuous quest to match the company's credo for design with an optimal quality of light. With the new Frax we have taken our fascination for the perfect beam outside. Clean-cut light distribution to boost your outdoor experience. Outliner and Skov perfectly shield the light, offering an unobtrusive solution to guide you the way.

#### CONNECTED SURFACES

First introduced in 2003, Connect was based on 2 fluorescent tubes facing opposite directions to graze light on 2 right-angled surfaces. Today, Connect balances on the edge between wall and ceiling or wall and wall, as you like.

#### **INIVISBLE YET TANGIBLE**

Impressed by his extensive expertise and passion during the design of the Polesano, we decided to go on our next adventure with lighting designer Dean Skira. Together with Dean we take you on a journey to the ultimate minimalism, introducing Nime.

#### **REFLECTIONS**

A new set of experiences has joined our decorative Reflections range. The playful pendant lamp Mantello challenges the classic shape of a lamp shade, playing with dimensions and textures. While the aluminium edition is opaque with a matte finish, its counterpart is transparent and glossy, crafted from mouth blown glass.

The pendant lamp Still is created by the Belgian designer Nathalie Dewez. The lamp plays with balance and movement. With its light source off centre from its point of suspension, it creates an ever-changing elegant dynamic. Poetic and playful, Still truly represents the spirit of Reflections.

#### STRETCH

Our collection of luminaires offers a wide range of lighting possibilities and styles for stretch ceilings, from surface-mounted to recessed luminaires - and even recessed magnetic profiles.

New in The Lighting Bible 14 is a range of mounting kits to be used for our trimless luminaires, an easy trimless installation into stretch

#### **5 YEAR WARRANTY**

At Delta Light we have full confidence in the quality of our products. All of our products are designed and manufactured according to the highest standards, using nothing but the best parts and technology. As a proof of our commitment we offer a 5-year LED warranty, starting as from the date of delivery of the product to the authorised distributor of Delta Light NV. Read about the details and conditions on the Delta Light website.

#### TECHNOLOGY EMBRACED

Colour consistency has always been a point of attention within the Delta Light product range. Up till now we have been using SDCM 2 - the best available – but in this Lighting Bible we introduce COB LEDs with SDCM 1, together with COB LEDs in Tunable White or Soft Dim. Lots of new solutions within both existing and new families.

DALI is one of the most frequently used dimming systems for projects no matter what scale. As leading company in lighting and member of DiiA, we embrace new technologies and a transition to DALI-2 is a logical next step. As such, all DALI dimmable luminaires and remote drivers in this edition of the Lighting Bible are DALI-2 compliant.

New installation facilities are available in our exterior products by offering 24V-DC solutions. Beloved families like Kix and Logic now come with a 24V-DC convertor included, making it possible to put a save 24V-DC line throughout the garden and connect the luminaires in parallel.

Last in line is the new design of the suspension and connection components. To keep the focus on the luminaire instead of its suspension we introduce a nearly invisible suspension with Small Trim (ST), next to the existing trimless suspension sets. A quick and easy way for a neat suspended light setting.

Throughout our history we've focused on creating lighting solutions that can enhance any building or setting. For some of these collections we have collaborated with external designers, opening up new exciting adventures in lighting.

Merging the vision and concepts of these leading architects and designers with our in-house R&D and production expertise, exemplifies how Delta Light, hand-in-hand with them, continues to step into the future.

#### SOLISCAPE

UNStudio, founded in 1988 by Ben van Berkel and Caroline Bos, specialises in creating ground-breaking architecture and design at all scales, from bridges to public buildings, offices, residences, exhibitions, products and urban masterplans. With over 120 completed projects in Asia, Europe and North America, the studio continues to expand its global presence with recent commissions in the United Arab Emirates, China, South Korea, Italy, Germany and the United States, amongst other countries. The name UNStudio stands for United Network Studio and refers to the collaborative nature of the practice.

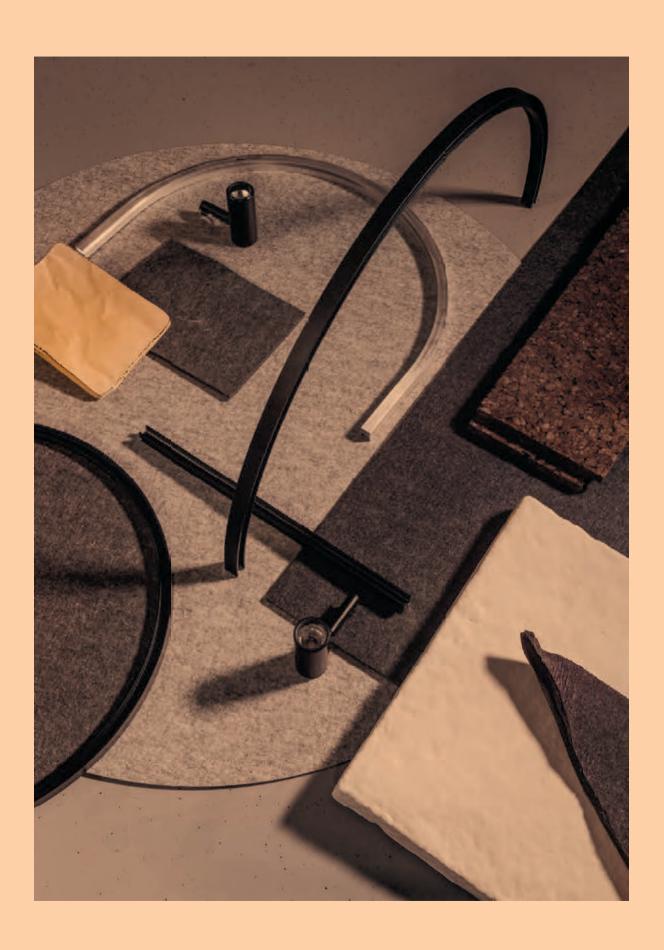

"As what we design today is normally built in three to five years' time, we're used to working with the future in mind. However, the future is changing faster than ever before. Even the most accurate predictions can be made redundant by a sudden advance in technology. To ensure we don't contribute to a waste of materials and investment that is no longer sustainable or appropriate in today's world, we develop strategies that not only anticipate the future, but possible changes to that future as well."

UNStudio and Delta Light have joined forces to endeavour to improve the wellbeing of people in our rapidly changing work environments, where human health and the war on talent have become a primary focus of employers. Together we developed SOLISCAPE, a lighting system that facilitates, responds, and contributes to solving these complex challenges. An extremely versatile and flexible lighting toolbox specifically designed to create human-centric environments.

**BEN VAN BERKEL**Professor AA Dipl. (Hons), (F)RIBA, Hon. FAIA
Founder / Principal Architect UNStudio
Founder UNSense

In 2018 Ben van Berkel founded UNSense, an Arch Tech company that designs and integrates human-centric tech solutions for the built environment. Ben van Berkel has lectured and taught at many architectural schools around the world. From 2011 to 2018 he held the Kenzo Tange Visiting Professor's Chair at Harvard University Graduate School of Design, where he led a studio on health and architecture. In 2017, Ben van Berkel also gave a TEDx presentation about health and architecture. In addition, he is a member of the Taskforce Team/Advisory Board Construction Industry for the Dutch Ministry of Economic Affairs.

#### NIME - POLESANO - CONFORM

Dean Skira is the founder of Skira, an award-winning practice based in Pula (Croatia) with projects also in the EU, Middle East, Russia, Canada, and the United Kingdom. For the past 30 years, he is building and creating mostly with intangible forms while working with investors, architects, and designers to create meaningful lighting experiences.

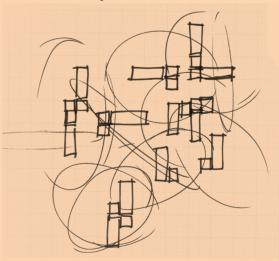

#### NIME

The absence in its presence The presence in its absence

With a miniature aperture of only 10mm, Nime focuses on what is important and puts it in the spotlight. It is not about Nime, it is about what Nime can do. The combination of its focusable beam angle together with its adjustability allows for a multitude of application possibilities, while maintaining a uniform, minimalistic look and feel throughout the project.

#### **POLESANO**

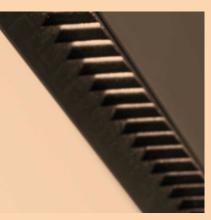

Modularity and flexibility to illuminate the urban fabric Polesano is a new concept in lighting instruments, designed specifically for urban settings, be that a pedestrian pathway, roadway, park, square, façade, or landscape. Polesano provides maximum flexibility for the designer to combine different optical characteristics, whilst keeping the same aesthetic for the entire system, regardless of the area.

#### **CONFORM**

Comforting for the human eye, showing vibrant colours, and boosting human activity.

Its elegant design with multiple colour combinations, its specific sun mimicking spectrum, its low UGR, its well-balanced down-up ratio... Conform is designed around the light. It not only perfectly embraces the light source, but it reinforces it in multiple aspects. Conform uses Delta Light's Natural Light Technology (NLT), state of the art LEDs with a spectrum that very closely matches that of the sun.

## NITEO LIGHTING

#### NEEDLE

Niteo is a premiere lighting design studio with offices in Seattle, San Francisco, and Singapore. With a portfolio ranging from museums to personal art collections, corporate offices to retail, and landscapes to art displays, their intimate engagement through design attention to detail is evident. Niteo delivers elegant lighting solutions via leveraging decades of experience in a collaborative and technically savvy way.

Delta Light collaborated with Niteo's Seattle office to develop the Needle. This bespoke luminaire was devised to provide a playful solution in an elegant form. As a single or grouping of multiple fixtures, the slender and flexible design permits it to blend into ceilings, peek around corners, or demurely clamor attention.

#### XY180

OMA is an international practice founded by Rem Koolhaas, operating within the traditional boundaries of architecture and urbanism. AMO, a research and design studio, applies architectural thinking to domains beyond. XY180 is a 3-piece collection of luminaires designed by OMA. The collection was born from a fascination with point, line and surface, key characters in the discourse of architecture. The collection uses precise geometric proportions. The base elements, which include a tube light and a spotlight, can be combined with a hinge, to generate countless light conditions, both essential and complex.

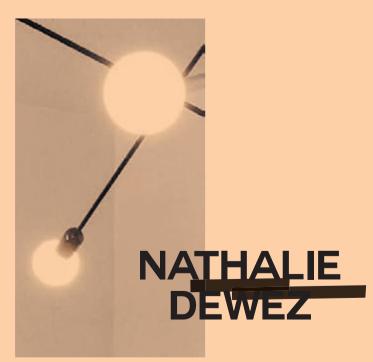

•

#### **STILL**

The work of Nathalie Dewez extends from small objects to monumental installations, from unique pieces to industrial products. Her designs reveal the passion for sculptural shapes and superior craftsmanship. Some of her iconic pieces have been awarded several times. Nathalie is a designer whose main medium is light and whose materials vary between metal, glass and other long-lasting medium, whether designing light fixtures, objects, furnishings, or large-scale sculptures. The Still lamp works as a mobile. This pendant lamp has the particularity of having the light source off-centre from its point of suspension, creating an ever-changing elegant dynamic. Due to its big length it dresses and emphasises a space, without

## THE ABSCENCE IN ITS PRESENCE, THE PRESENCE IN ITS ABSCENCE.

The black hole reflects no light, but the light of Nime finds its way out. The tangible part disappears inside its heart, and the intangible part illuminates the object.

#### THE FIFTH FORM OF LIGHT

The first form of light is in the source.

The second is the invisible form of light itself.

The third is the form of the object revealed by light before it touches it, the fourth is the form of the shadow.

And the fifth is the form of the consequence that comprises all the previous four forms, as well as the way we feel and experience the space considering the four forms.

Design by **DEAN SKIRA** & Delta Light

www.deltalight.com/nime

Better not underestimate Nime, as the aperture of only 10mm is only the façade that hides away a host of possibilities to control your beam. Within the same opening and thanks to an ingenious set of custom optics, Nime allows you to focus the beam from 20° up to 40° and offers rotation up to 355° and tilting up to 30°, without changing its looks. With this magic trick, Nime lets you:

Emphasize objects on vertical and horizontal surfaces, without visual appearance of the fitting or its source

Light up small to large objects, even when they are not aligned with the luminaire.

Perfectly address the light where it is needed, even in slope ceilings.

Create equal circles of light from both low and higher ceilings.

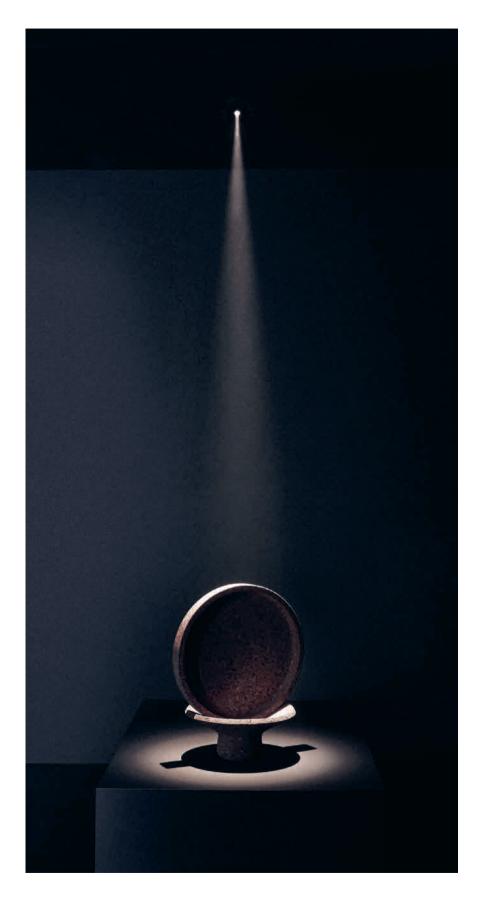

#### DEAN SKIRA

is the founder of **SKIRA**, an award-winning practice based in Pula (Croatia).

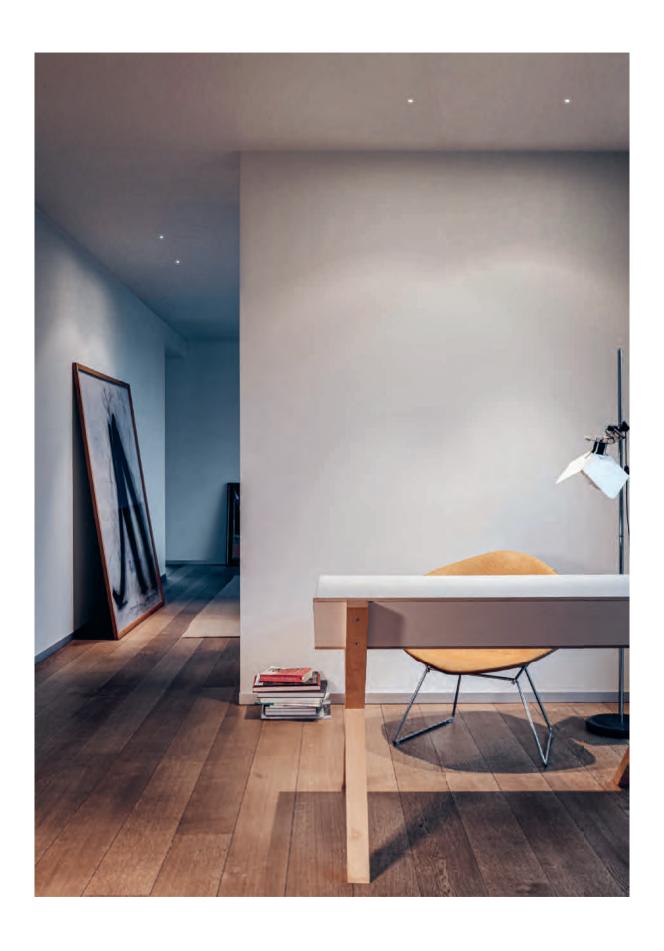

Dean is travelling in light and walking through shadows. What started as design work with tangible forms, over the past 30 years, developed into building and creating with the intangible and the ephemeral.

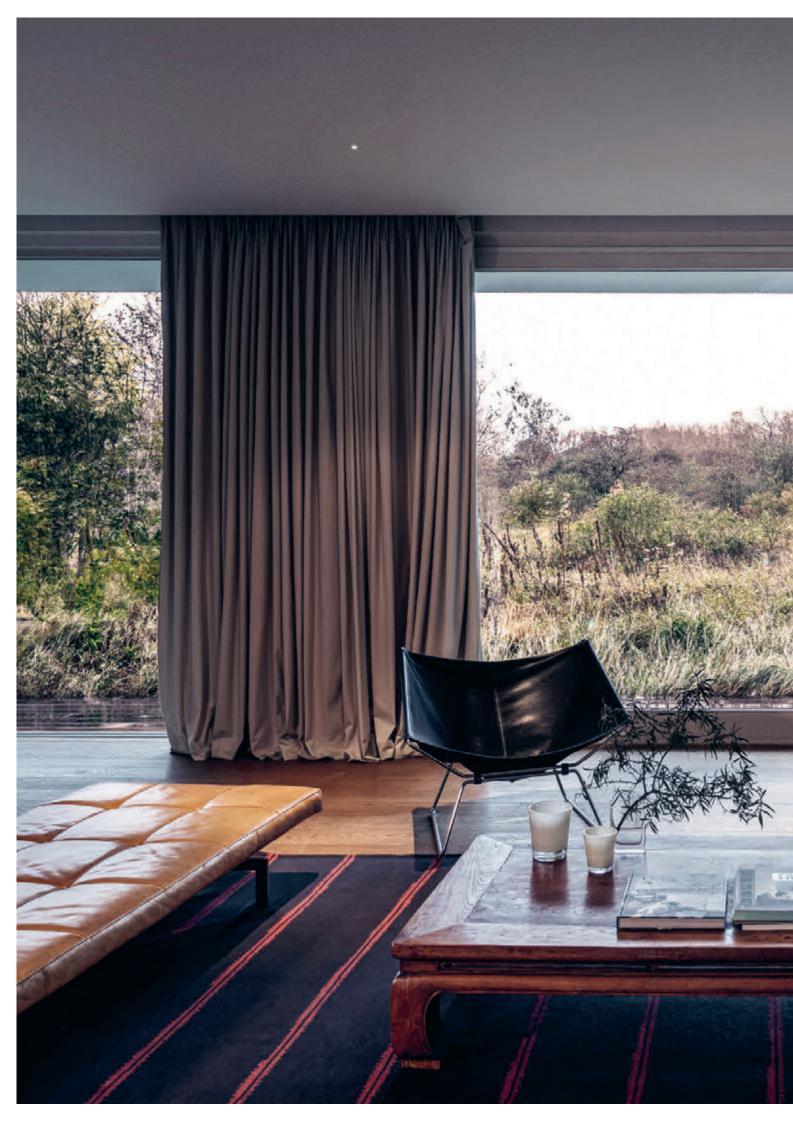

"At **SKIRA** we refer to light as to an intangible but powerful building material. We create architectural lighting and product design to suit our projects. By

Where the initial evolution in LED and optics focused on better output, smaller chips and longer lifetime, the second evolution is again shifting to user comfort with more precise optics and better light control.

As the purpose of the iMax II family is to provide the best visual comfort to the user - thanks to its recessed LED engine - this range is perfect to build further on this evolution: improved efficiency, improved beam angles and the possibility to combine all versions as they use uniform LED engines.

The iMax II range combines premium LED engines with precise optics, delivering high performance, maximum efficacy and high quality illumination. iMax II is using lenses out of plexiglass HW55, a material able to withstand high temperatures and allowing lumen packages up to 2000lm. Next to the high output, the lenses allow for a perfect control of the beam angle and a high uniformity on the light emitting surface, which results in reduced glare. Furthermore, if a different beam angle is required, the lenses can easily be interchanged.

The round versions with trim within the range are available with a clear glass, offering IP54. This enables you to continue minimalism and uniformity throughout bathrooms, wellness areas and other indoor damp locations.

iMax II fits in The Soft Ceiling concept from Delta Light, as it focuses on minimal appearance, giving focus to the light instead of the fixture. As such, the collection fuses
Delta Light's aspirations for design sophistication and attention to detail, with precise engineering and premium materials, resulting in minimal fixtures with maximum impact. The interchangeable tubes and colour finishes allow you to apply luminaires that disappear into the background.

www.deltalight.com/imax

#### **CHOOSE YOUR LED COLOUR**

2700K / 3000K / Soft Dim

## CHOOSE YOUR OPTICS

Superspot 6° Low Power 12° / 20° / 33° Mid Power 18° / 26° / 39°

CHOOSE YOUR ACCESSORY
Honeycomb / Glass SBL / Linear Spread Lens / Softening Lens / Spread Lens

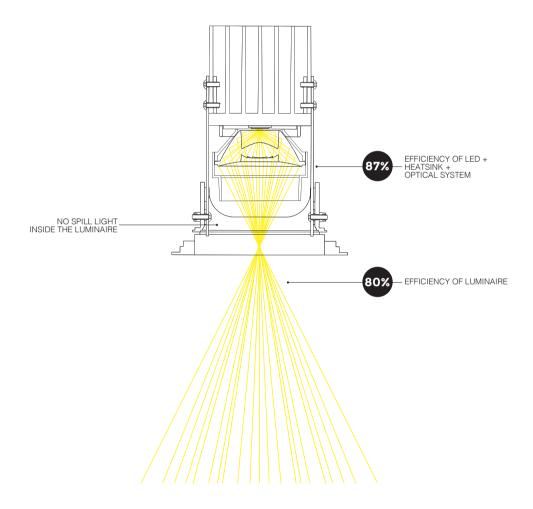

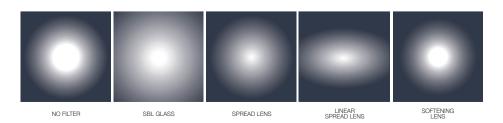

iMax II makes use of hw55 acrylic polymer lenses to obtain its optical characteristics. The lenses not only allow to control the light in the desired way, the specific copolymer material is high heat resistant and therefore higher lumen packages can be reached.

#### HIGH EFFICIENCY

Apart from the high light transmission of the lens for optimum efficiency, its specific construction creates a focal point that is not inside the luminaire, but at the height of the opening in the ceiling. In this way, every single ray of light produced by the LED engine is being directed through the lens towards the opening of the iMax II luminaire. This reduces the spill light inside the luminaire and increases its efficiency.

To offer even more flexibility and design freedom to the lighting designer, a range of light refining accessories is available to alter the light effect to the specific needs of the setting. A honeycomb to further minimize the direct glare from the light source, a sandblasted glass to create a diffuse general light effect and 3 specific lenses to either create a more oval or a wider light distribution or to smoothen the edges and create a softer transition.

#### ADJUSTABLE WITH TRIM

A versatile accent lighting solution to emphasize individual objects or architectural elements. The tilt mechanism allows the luminaire to be angled with precision up to 30°, allowing for optimum beam alignment. As a result, the light is emitted exactly where you want it. With iMax II Adjustable, the hole in the ceiling is being covered by the trim on the luminaire. It comes as a round or square solution with finishing in white or black and topped off with a colourful tube in white, black or gold.

#### ADJUSTABLE FLUSH

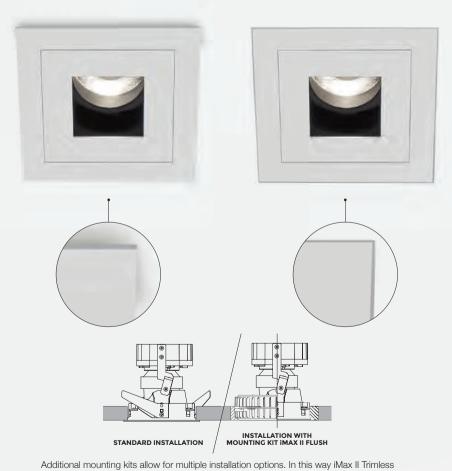

To further reduce the visual impact on the ceiling, a mounting kit is available to install the standard luminaires flush with the ceiling. This results in a clean ceiling sight, without the repetitiveness of the luminaire trim coming out of the ceiling.

#### ADJUSTABLE TRIMLESS

A super smooth finish combines ultimate minimalism with maximum eye comfort.

This version comes with a trimless mounting kit enabling quick and precise installation and finishing. The interchangeable black, white or gold insert allows you to match the fixture with its surroundings. iMax II Adjustable Trimless is available in a round and square finish.

Entero is derived from the Spanish language and means "complete". A perfect summary described in 1 word, as Entero is a complete family of recessed downlights providing a solution for diverse lighting

The bases of Entero are 3 light units, each composed of a high-quality LED and a hybrid optical compartment. The different LEDs have a uniform colour consistency and the hybrid optics provide a comfortable light with perfectly outlined beams, making Entero easily combinable throughout an entire project.

Starting from the different light units, Entero offers a series of options in a round or square design. Available in different power levels with a multitude of beam angles, Entero comes as adjustable luminaires - with or without trim - to be use indoors, outdoors and in damp locations.

Options as Soft Dim, Tunable White and wallwash

lighting make the Entero family complete.

## SNEAK-R

A wallwash light effect can upgrade any project, adding sophistication and emphasizing detail in interior design. Sneak-R is a top-notch wallwash range in Delta Light's collection, allowing the user to create depth in a room via an evenly illuminated wall. With Sneak-R you can reduce the contrast between a well-lit workspace and its environment, or it gives your artwork the perfect light it deserves.

Engineered to perfection, the Sneak-R combines a slightly curved cover with a lens, resulting in an evenly lit wall, from floor to ceiling. Thanks to the design harmony between led and lens, Sneak-R can be kept very compact and does not attract any attention to the luminaire. The cover design reduces the angle of the mechanical cut-off, resulting in a minimum of glare and a maximum of visual comfort.

ARCHITECTS DTR STUDIO - LIGHTING DESIGN - BIG ARCHITECTURAL LIGHTING - PHOTO CRIS BELTRÁN

The name of this product says it all.

The Hole In One - available in both rectangular, square and circular shape - lets you see a hole in the ceiling and nothing else. That is as long as you don't stand underneath this lighting fixture. This fitting offers enough space for different modules being able to point at different directions, all from within the same hole in your ceiling, making it very discreet.

Light and space are inextricably linked with one another, something that the Hole In One plays on so ingeniously. Intended in the first place to be functional lighting, this contemporary design pokes a little fun at its surroundings at the same time. The black background in the fitting creates the illusion of an unfathomable unendingness around the light source. The magnetic mounting of the modules makes it easy to quickly adapt the lighting to a new setting.

## SPLITBOX

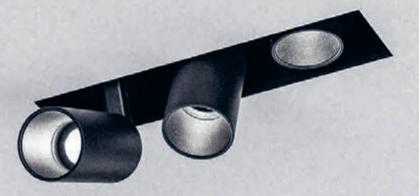

Splitbox is a trimless integrated lighting system, with the full flexibility of surface mounted lighting. A black minimalistic cove of 80mm wide and 225mm or 315mm long can be equipped with one, two or three highly flexible spot modules. These Spy modules can remain encapsulated in the ceiling or emerge in its entirety and be tilted 90° while rotate 355°, allowing focused illumination in one swift move.

The black background inside the cove creates an illusion of unendingness around the light spots, enforcing the fully integrated architectural lighting concept. A range of light refining accessories is available to guarantee optimal optic performance and maximum eye comfort. The outside of the Spy modules is available either black or white, which can be combined with exchangeable inserts in multiple colour finishes.

# CARREE

The Carree range is Delta Light's answer for easy-to-install, timeless and functional recessed spots, as it has been a Delta Light classic for many years. This family of square recessed luminaires offers refined solutions for LED or halogen, either with or without trim. The straight lines in the design make a contemporary spot out of Carree, not only useful in modern architecture but also in many other applications.

Carree can be used throughout the entire project, as it also includes IP44 solutions for bathrooms and even IP65 luminaires for outdoor use.

# EN-SUITE

With an impressive delivered output of 130 lumens per watt, in a  $54 \times 50$  mm fitting, En-Suite represents the next generation of downlights.

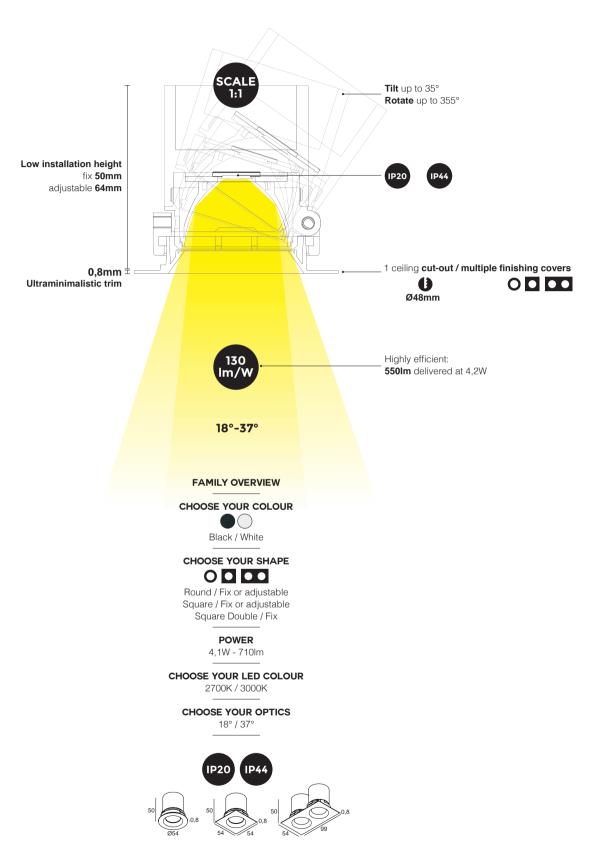

The super energy-efficient En-Suite has the wellbeing of its users and the planet in mind. Reduced glare technology offers comfort to all who experience it. En-Suite is made from minimal components and is for 80% recyclable.

En-Suite is available in IP20 and IP44, which allows a uniform look throughout all spaces of your project, be it a hotel, restaurant or home, even in damp locations such as bathrooms. En-Suite comes fix, adjustable, round, square, single and double, spot and flood, offering solutions for all needs in your project.

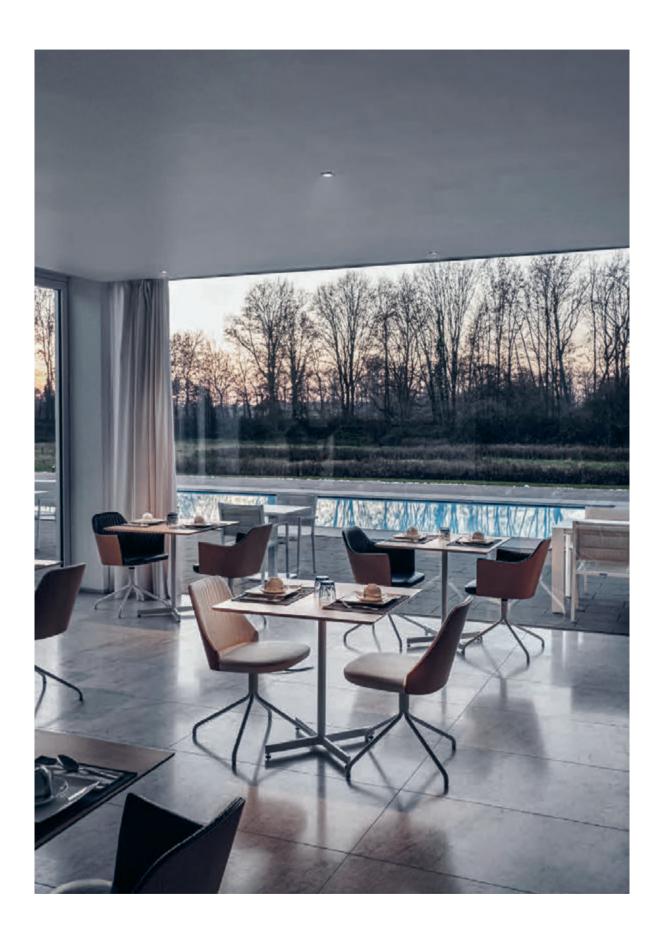

En-Suite presents an answer when facing limited installation height in ceilings. When using a fixed fitting and remote driver, En-Suite requires a 50 mm installation height. With its diameter of 54 mm, a circular cut-out of 48 mm suffices for a quick installation, no kit needed. For a smooth and virtually trimless result.

www.deltalight.com/en-suite

The Reo collection is more than one product, it is a family which offers a solution for many lighting demands, from residential to hotel, restaurant to retail and much more. In line with this philosophy, Reo comes in single and double fixtures, round or square, orientable or fixed, in multiple finishing colours, for both indoor and outdoor use.

The design of these recessed conical spots delivers a hardly visible transition from the intense light to the ceiling, resulting in a halo-like effect, ideal to give the space an extra dimension.

#### MICRO REO

Being the smallest member of the family, Micro Reo excels in minimalism in design and excellence in performance as it offers a 7,1W LED solution. It comes as an IP20 version and as a luminaire with higher IP-rating that can be used in bathrooms and other wet areas.

#### MINI REO

Mini Reo offers a multitude of lighting solutions, as it combines multiple beam angles in both non- adjustable and adjustable luminaires. Spot, Medium or Flood can be combined to fit the specific needs of the project.

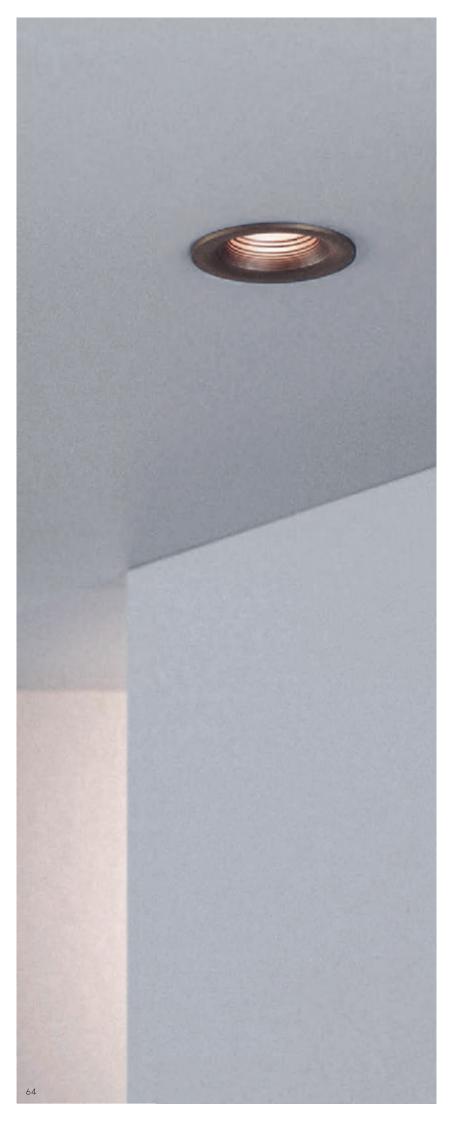

#### REC

Similar to Mini Reo, Reo offers adjustable and non-adjustable downlights in multiple beam angles. With an output up to 10,4W, Reo can easily be integrated into hospitality and residential projects, especially when using the Soft Dim version which creates a warm and cosy atmosphere when dimming down the luminaire. Reo comes in a round and square design. Within the round design one can opt for a smooth finishing of the inner cone or choose the ribbed version that reduces the glare thanks to its cascading transition from light source to ceiling.

### ARTUUI Everything about Artuur catches the eye, be it its design, its optical compartment or its small protrusion when installed into the ceiling. Artuur comes as a downlight with sloping edges towards the center, both round and square. The design twist is in the asymmetrical square version, easily deceiving the eye but inspiring you to present creative layouts. Another design element is the sophisticated lens on top of the deeply placed LED. While offering an outstanding quality of light, its remarkable aesthetics wow you, even when Artuur is not turned on. Additionally, Artuur can combine pleasant general lighting with uniform wall washing, as a secondary LED module softly throws its light on vertical surfaces. When installed into the ceiling, Artuur adds depth into the room owing to its gentle protruding ring. Small enough to be noticed, big enough to make a difference. Put the complete luminaire into a recessing kit and Artuur goes from protruding to trimless refinement at best! www.deltalight.com/artuur

# DEEP RINGO

The conical shaped design of the Deep Ringo fixtures and its deeper placed LED source make sure that glare is reduced to a minimum when Deep Ringo is installed in the ceiling. The small trim gives a refined touch to this elegant luminaire.

Available in 3 sizes, with trim or trimless, fix or adjustable, a range of beam angles and multiple finishing colours, Deep Ringo is an easy-to-use downlight throughout the project. Its golden or bronze finish is perfect to add a sniff of luxury to the room.

#### MINI DEEP RINGO

Mini Deep Ringo is playful, as it comes in a multitude of finishing colours, has 3 different beam angles to choose from and can be fix or adjustable. A range of possibilities in a slender design.

#### **DEEP RINGO**

Deep Ringo is the most elaborate of the family, offering LED and halogen solutions, for use in both dry and wet areas. Similar as the Reo family, Deep Ringo also offers a ribbed version that reduces the glare thanks to its cascading transition from light source to ceiling.

INTERIOR DESIGN MAISTER / PHOTOGRAPHY BERT DEMASURE

INTERIOR DESIGN LICUA DESIGN - LIGHTING DESIGN BIG ARCHITECTURAL LIGHTING - PHOTO JUANAN BARROS

The Gyn family is a range of gypsum luminaires that complete Delta Light's elaborate range of downlights. The possibility of finishing these products on site in any desired colour makes them suitable for many applications.

The curved shape of the Gyn frame provides a smooth transition from ceiling to luminaire. When Gyn is turned on, the curve provides a soft glow on the ceiling, similar to Reo fixtures.

As a round or square gypsum luminaire, Gyn D steps away from the curved edges and goes straight into the ceiling. With a deeply recessed LED module, Gyn D offers additional visual comfort as it shields off the light source from directly being looked into.

## KADET

With an installation height of only 60mm for Kadet S and 70mm for Kadet M, the Kadet range is an ideal solution for applications where recessing depths are very limited.

Nevertheless, Kadet succeeds in offering a low glare trimless solution within this small height, thanks to the clever design combination of LED engine and optics: optimized visual comfort thanks to the recessed LED engine, optimized heat dissipation and optimized beam control. The smaller Kadet S is ideal for installation in hollow ceilings, while the bigger Kadet M can also be installed into concrete, thanks to its multifunctional recessing kit.

## TWENTY-7

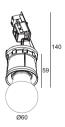

Despite the many advantages of LED as a lighting solution, the incandescence light bulb still recalls characteristics as warmth and cosiness to many people. As a flashback on how it used to be, Twenty-7 brings these characteristics back to live.

As a recessed luminaire where only the light bulb is coming out of the ceiling, Twenty-7 throws light throughout the room, enlighting the space from ceiling to floor.

By using a LED filament lighting bulb, Twenty-7 gives you not only warmth and cosiness, but at the same time adds the advantages of LED.

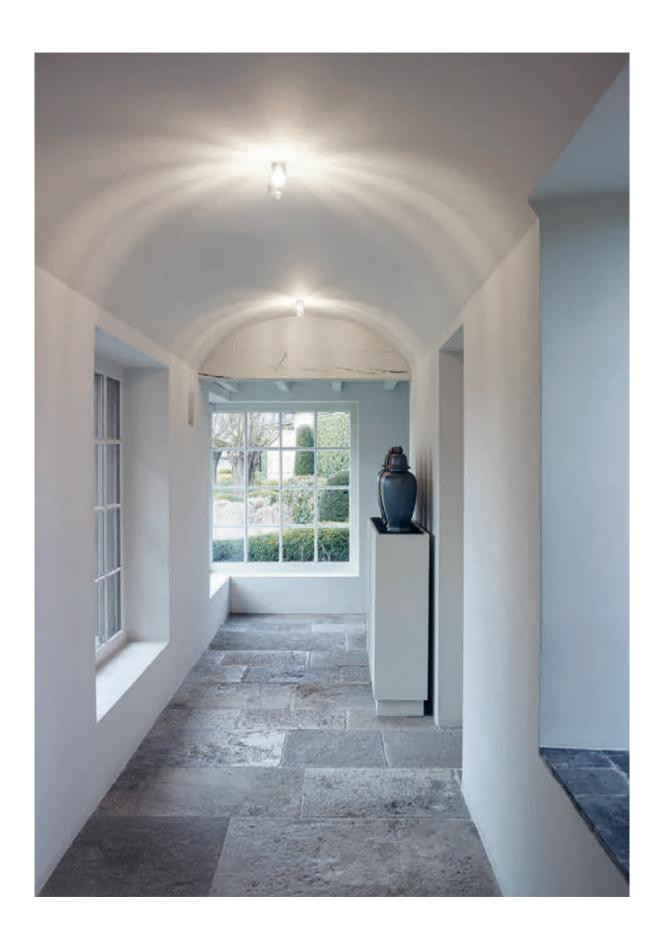

#### www.deltalight.com/twenty-7

### GRID

The Grid product family is a longstanding classic in the collection. First as halogen and discharge solutions, later as LED downlight and afterwards updated to the Snap-In principle, a smart and easy way of separating the mounting frame from the LED module, with comfortable installation as a result. This grid range is all about flexibility, as the single or double light units can be directed any way you want.

#### MICROGRID IN

Microgrid In completes the Snap-In range as it uses a similar principle of dividing the light unit into a mounting frame and a light module that can be snapped into the frame after installation. Microgrid comes in single, double and triple set-ups with trim.

A visor is available to further reduce the impact of the intense light coming from the miniature light source, shielding the light source from directly looking into.

#### MINIGRID IN ZB

The ZB principle stands for clean lines and minimalist design. Theses luminaires can be built into a cove in the ceiling or an optional box can be used as easy installation frame.

#### SNAP IN

The Snap-In principle equals modularity and flexibility at its best, it grants the opportunity to the lighting designer to use his creativity: combine single and double units, use multiple beam angles or play with colour. All to use as surface mounted luminaire or as recessed spotlights, both with or without trim

Dividing a luminaire into multiple modular parts not only creates uniformity within one family, it also facilitates the installation by giving the opportunity to the installer to place the frame in advance. No need to worry for the lighting modules in further finishing of the room, as the modules can be clicked into the frame afterwards.

#### GRID IN

## MULTINOVA

Multinova has something familiar and something fresh at the same time. As a disc of light, Nova refers to the Supernova range, as both families share similarities in looks and ways of installation. But Multinova has some additional features to make it multi-applicable, hence Multi in the name.

With 2 different diameters, a down and down-up version and a limited height of only 69mm, Multinova is perfect to use in different ways. Its small dimensions fit in any residential or hospitality project, as a track mounted luminaire it suits any retail environment and with a prismatic sheet for reduced glare it even adapts in office settings. Moreover, Multinova can be used on our Magnetic profiles for general lighting.

Multinova comes in our standard black or white and can also be finished in the warmer Gold Coloured to enrich its surroundings. To top it off – next to a sandblasted or prismatic optic – one can opt for a smoked sheet at the front for a more decorative touch. When turned on the disc is fully lit, when turned off a deep dark arises, ideal in combination with a Gold Coloured Multinova.

#### SUPERNOVA XS

With its 26 cm or 33 cm diameter, the Supernova XS (Extra Small) can be considered to be the baby in the range when it comes to size, but not when it comes to performance and skills. It only needs 6 cm of height to hide away an intense cluster of powerleds in its perfectly curved aluminium body. Following its big brother, the recessed Supernova XS is distinguished thanks to its remarkable tilted application when installed into the ceiling, a particular way of changing a simple round downlight into a playful eye-catcher.

The recessed version is a particularly eye-catching option in the Supernova range, thanks to its tilted application. A recessed kit facilitates installation, allows you to customize the depth and angle of the Supernova, and ensures the inner workings of the fitting are concealed within the ceiling.

Surface mounted, Supernova is a timeless lighting solution that guarantees powerful illumination and striking atmosphere, blending harmonically into its space. Its uninterrupted circular form and neutral character enhance any room, from hotel lobbies to corridors to shops, or any other type of project.

A suspended Supernova uses four delicate steel cords to enable an easy suspension. The down-up version features a polycarbonate on top to avoid dust entering the fixture and guaranteeing a pleasant and an immaculate indirect light effect. Thanks to the transparent supply cable and the trimless suspension kit you can opt for a very clean and minimalistic ceiling suspension.

## SUPERDOME

Cosiness is large and round; of that the Superdome is proof. This luminaire was initially created as an XXL version of Tweeter, one of the award winners in the collection. The Superdome is perfectly at home in double ceiling heights, or just as an atmospheric dome over the dining table or as an eye-catcher in the hall at home or the office.

The body made from polyester is available with a black or white exterior, the interior is white for optimal light diffusion. At first glance the Superdome looks very simple, but it is well thought-out. The light source is concealed behind a large diffuser, recessed into the dome obscured direct from view and preventing glare.

## XY180

XY180 is a 3-piece lighting collection designed by OMA. The collection was inspired by a fascination with point, line and surface; key architectural elements. The floor, wall and ceiling lights are meant for individual and shared workspaces, but can also be applied to domestic and public interior spaces.

The line uses precise geometric dimensions while the base elements - which include tube lights and a spotlight in either a discreet 3,9W or a powerful 7,1W - can be combined with a hinge to generate countless lighting conditions. As individual components, each part is familiar. When assembled however, they can take on unpredictable and asymmetrical positions.

The tube lights create diffuse ambient lighting, while the spotlights provide focused lighting. By exposing the light and allowing it to pivot, the fixture becomes the main feature as it shifts into multiple configurations; a product that contributes to the creation of space, not only by the light it emits, but also by its physical presence.

### PUNK FAMILY

Step away from brave, alter yourself and dare to dare. This spiked design family breathes creativity and allows you to play with light and texture. To integrate the Punk experience throughout your project, the Punk design is available as a Clip version, as pendants, wall luminaires and in the XY180 range.

Available in Black, Gold Coloured and Black Pure, a Black coloured finish with pure aluminum topped spikes.

#### **PUNK CLIP**

Don't be deceived: Punk Clip may look small with its diameter of only 39mm, its performance is big! The Clip system lets you install Punk as a semirecessed light, only letting the luminaire head peeking out of the ceiling.

#### PUNK C

With its particular design, the pendant versions of Punk make a statement on their own, but hanging them in a cluster make them look like a real eyecatcher. Combining different Punk lengths and different finishing colours makes a unique setting out of every Punk cluster.

Vizir and Hedra add refinement, finesse and colour to the range. They are characterized by an atypical hinge, a design element that not only catches the eye, but also serves as storage for technical parts inside the luminaire.

Next to black and white, the Vizir and Hedra are available in Gold Coloured and Black Bronze finishes, either polished or in faceted texture. The faceted design of the Hedra captures and reflects the ambient light with an ever-changing look a result. It is also the typical design element of the Hedra family, a series of pendant, spotlight and wall mounted luminaires, available as full LED solution or for retrofit bulbs.

www.deltalight.com/vizir-hedra

#### VIZIR - HEDRA CLIP / ON

The high-quality finishing on Hedra and Vizir instantly adds a touch of class to the room. The two installation possibilities - surface mounted or semi-recessed - allow to use these directable spotlights in any kind of application. Furthermore, the very slender base with integrated power supply of Vizir and Hedra 2 On bring extra flair and elegance.

#### VIZIR - HEDRA C

The pendants within Vizir and Hedra make you play with light and design.

By combining decorative E27 bulbs with integrated LED, short with longer tubes, Vizir and Hedra or Black Bronze finish with Gold Coloured, every set-up will be different and unique.

## OT.COM FAMILY

First introduced in 2004 as a single LED luminaire, upscaled in 2008 as a multiple LED luminaire with 4 or 6 LED dots, implemented in the profile section in 2010 as a module with 4 or 6 LEDs, the history of Dot.Com within the Delta Light range goes way back. With LEDs being utterly functional and performant nowadays, Dot.Com is up to its second revival, coming as a complete family of luminaires with multiple LED dots to create the most discreet, yet highly functional light settings.

www.deltalight.com/dot-com

## DOT.COM S

The Small version only needs 25mm of width, a nearly invisible appearance yet with visible impact.

### DOT.COM M

The Medium range includes an adjustable version with trim and a trimless solution. The adjustable Dot.Com M – with tilting possibility up to 30° - is ideal for instance to emphasize an artwork on the wall. The specific design of the trimless luminaire grants the opportunity to install it either completely into the ceiling or semi-recessed, to evoque more expression into the room.

### DOT.COM L

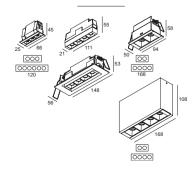

With an output up to 12W per luminaire, the Large range is the most powerful within the Dot.Com series. The Large version is the only version within the Dot. Com range that also offers surface mounted alternatives. Similar as for recessed installation, Dot.Com L brings a 2 LED and a 4 LED version within a compact design. With its low glare - thanks to the combination of individual reflectors per LED - Dot.Com L is perfectly applicable for office use.

34° / 59°

Medium 14° / 33° / 49°

Large 16° / 32° / 46°

### **DOT.COM WALLWASH**

Dot.Com is not only limited to spotlight beam angles, it also has linear wallwashers in its range for a soft, even light effect on vertical surfaces. These come as single luminaires both recessed as surface mounted, as modules to fit in the magnetic profiles and as a bespoke trimless profile solution, perfect to adapt the light to your specific desires.

## HALOSCAN PATENTED EX-CENTRIC ROTATION SYSTEM FAMILY

Haloscan is a family of accent lights that come semi-recessed, surface mounted or as modules on the magnetic profiles. Designed around its flat optics, Haloscan combines ultra-minimalistic looks with a pleasurable light effect. The light is softly spread by the plane lens, creating up to 4 different beam angles, from spot to floodlight and even linear light.

To smoothly turn and tilt, Haloscan uses the Ex-Centric Rotation System, an asymmetrical hinge that combines rotating and tilting abilities in one swift move.

## TWEETER PATENTED EX-CENTRIC ROTATION SYSTEM FAMILY

Tweeter has been one of the most remarkable families in the Delta Light collection for many years. Available as ceiling recessed and ceiling surface mounted, Tweeter introduces new levels in flexibility, both in movement as in lighting application. Tweeter is based on Delta Light's Ex-centric Rotation System, characterized by an asymmetrical hinge joint, combining extreme rotation and tilting abilities, all in one swift whirling motion.

The recessed Tweeter versions enable a maximum fuse of light and architecture. The spotlight heads are identical to the surface mounted installation and handling is simple and convenient. The double shell design prevents ceiling exposure, while the flexible inner shell tailors for any lighting need. Ultimate refinement is reached with a subtle aureole of light circling around the central led, offering improved lighting aesthetics. The application of the Ex-centric Rotation System not only upgrades movement of the fixture, but more importantly also provides advanced lighting abilities. The rotation mechanism was designed so that the light beam is not cut off, resulting in maximum efficiency.

www.deltalight.com/tweeter

The Tweeter On strikes a perfect balance between lighting quality and energy efficiency, adding value to the design statement of its environment. This striking yet elegant fitting suits every interior environment, pleasing the user with its supreme suppleness and intriguing appearance. Tweeter excels thanks to its ingenious design, refined to the last detail.

Constant evolution in LED has allowed for Tweeter M to be designed: minimal in dimensions, but using the same Ex-centric Rotation System for utmost flexibility. Finishing can be done in either full white or a remarkable Black-Chrome combination.

## ODRON

## HAVE ANOTHER LOOK

Don't be fooled: Odron may look peculiar at first sight, nevertheless its specific design is intended to create a compact yet powerful lighting solution. A second look puts everything in perspective: the flat design of the disc in combination with the shallow base results in a highly functional luminaire within a limited height of 45mm.

As from now, any additional look on it makes you appreciate Odron more and more: its possibility to serve both as a straightforward downlight or as an omnidirectional spotlight, the shiny details of the cover in contrast with the structured lacquer of the body or the touch of colour it adds thanks to the additional golden cover, it is clear that Odron enriches the space in more than one way.

The elegant Odron is available as a clip version and as a single or double spot to be mounted onto the ceiling or as module for our Magnetic profile range.

# BOWIE

## KEEP YOUR EYE ON THE BALL

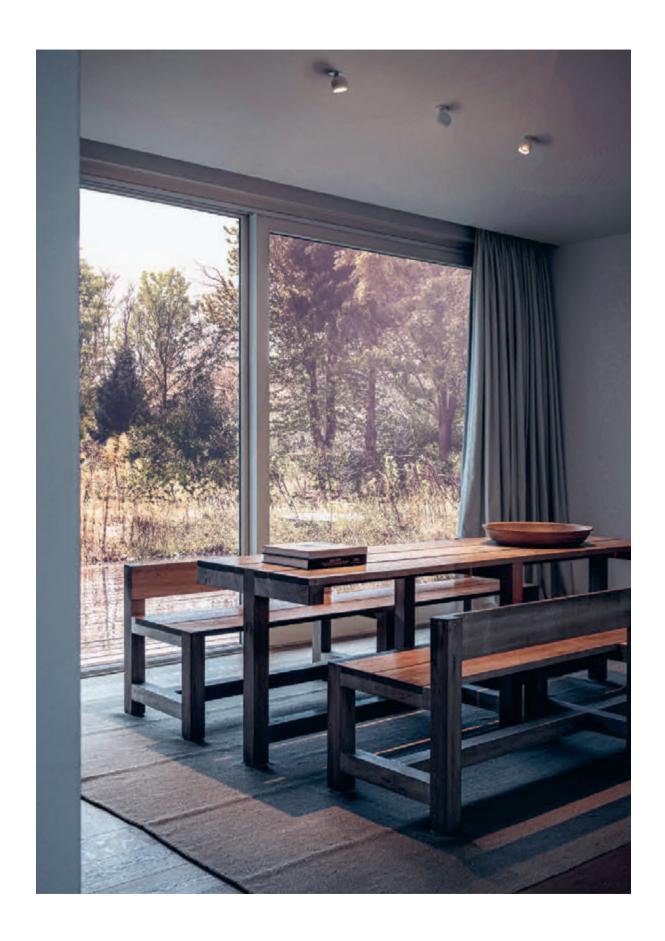

Add some body to the room with Bowie, it impresses through its spherical shape. Twist and turn, tilt and aim, Bowie will always look the same, whatever its direction and no matter the angle you look at it. Bowie in pure white or black easily fits in any interior and adds a touch of richness to the room. Within its range, Bowie comes as a semi-recessed Clip version, as a single or double spotlight to be surface mounted or as module to fit into our Magnetic profile offer.

www.deltalight.com/bowie

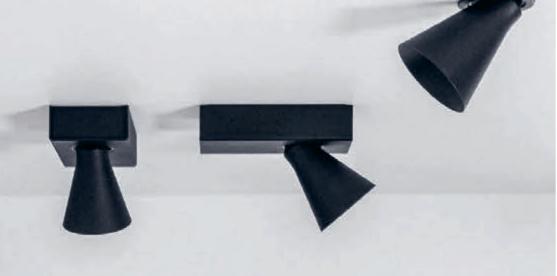

## PION FAMILY

PATENTED EX-CENTRIC ROTATION SYSTEM

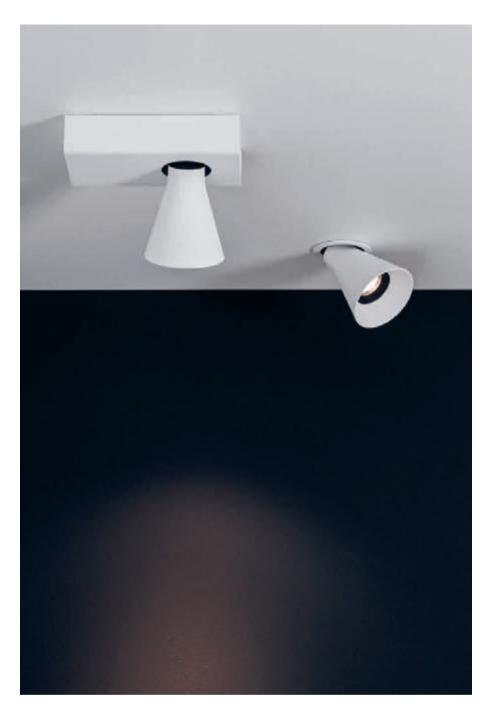

#### THE QUEEN, NOT THE PAWN

The shape of Pion resembles a lot the one of a pawn in a game of chess, but that is also the only resemblance. Opposite to a pawn, Pion is able to move around freely thanks to its unique Ex-centric Rotation System (ERS). Starting as a fix downlight, Pion can easily be turned into a periscope overlooking the room, simply by rotating its head.
The Ex-centric Rotation System then enables Pion to tilt its head, allowing it to spy around over 355° and tilt up to 90°, so aiming possibilities are unlimited. Its elegant design in combination with the frisky colour combinations transform Pion immediately into the queen of the room, overlooking the scenery. Like any jewel, the colourful tubes serve as an accessory to top off its feminine shape in style.

www.deltalight.com/pion

## BALANCED IN FORM AND FUNCTION

Pion is available as semi-recessed version, as surface mounted spotlight or as a plug-in module for our Magnetic profile range. As a recessed variant, the Ex-centric Rotation System is semi-recessed into the ceiling, hiding away the more technical part of the luminaire. As a ceiling mounted solution - with up to 3 modules per luminaire - Pion is not only about the looks, it is a textbook example of form meets function.

In this way, the triple surface mounted version of Pion completes 4 functions. 3 of them are lighting up the room in 3 different ways from only 1 feeding point, the 4th is doing it without compromising on style. The clean lines of the driverbox perfectly complement the organic shape of the luminaire's body.

## UHO FAMILY

At first sight Uho appears to be simple. In close-up, the workmanship is being revealed in the little details. The refined ratio of the body compared to its diameter, the small joints that create a sophisticated look, the softly curved hinge that perfectly matches the contours of its body. With Uho, elegance is in the details. Uho is available as accent light on our small profiles Splitline 14 and Shiftline 19 and as a spotlight it comes as a single or double Clip version and as a triple unit for surface mounting.

# SPY

Minimalism, functionality and versatility are the key terms to describe this extensive collection. The Spy was designed to meet multiple lighting requirements, an ideal solution for accent lighting in residential, hospitality or commercial spaces. The range features low to high lumen packages, narrow to wide beam options, standard or specific LED colours, recessed to surface mounted and track applications, different colour finishes and combinations, and can be equipped with multiple light refining accessories.

Following the constant changes in the world of LEDs and optics and the evolution to better user comfort with more precise optics and better light control, the complete Spy range has been upgraded. The result? Fresh shapes and additional finishing colours, better light comfort through hybrid optics, improved LED colour consistency and new perspectives with Tunable White and Soft Dim.

The renewed Spy family comes in diameters of 27, 39, 52, 66 and 90 millimeters, a range of spotlights to fit any purpose. While the smaller versions come in the lively colours Flemish Bronze, Flemish Gold and Gold Coloured, the bigger Spy's offer Tunable White and Soft Dim solutions in multiple beam angles.

PATENTED EX-CENTRIC ROTATION SYSTEM

The most extensive member within the Spy family: different installation methods, multiple light refining accessories to be added, mid- and high-power LEDs and even the possibility to opt for Soft Dim or Tunable White.

Containing a more powerful LED engine than Spy 39, Spy 52 has the same elegant ratio of diameter versus length. Combined with the Ex-centric Rotation System to swivel around, Spy presents itself like a curious object peeking from the ceiling, able to spy up to 350° around the room.

Requiring only 35mm of recessed depth, the Clip version of the Spy 52 combines easy installation together with a clean ceiling appearance and lots of functionality.

Similar as for Spy 39 On, single, double and even triple luminaire heads can be combined in a surface mounted solution.

To complete the family Spy 52 is available with a Soft Dim or Tunable White LED inside. A Soft Dim version offers the cosy feeling of halogen when dimming down, changing the colour temperature into a warm glow of light. Tunable White allows you to change the type of white to your preference, from warm up to very cold white.

www.deltalight.com/spy-52

SPY 52

#### SPY 66 / 90

Spy 66 offers a range of optics to create multiple beam angles within different output levels. Ranging up to 24,6W, Spy 66 is available as Clip and On version, allowing an easy installation. With 3 beam angles in standard white LED colours and Tunable White, Spy 66 is perfect to apply in retail and public environments.

Spy 90 On is the surface mounted Spy solution for high output and ultimate performance, as it has an integrated dimmable driver inside. In line with the complete Spy range, the tubular deign can be finished with the coloured insert of your choice, but Maxispy On especially wows you with its output up to 3200lm and its choice of 3 different beam angles.

#### SUPER-OH! SLIM

Evolving from our existing Super-Oh! family, Super-Oh! Slim stands out in design and efficiency. With a width of only 44mm and a luminous efficacy up to 119lm/W, this family of halo's combines slender elegance with big performance. Super-Oh! Slim comes in 2 diameters - 800mm and 1200mm - and is available with only direct light or a combination of direct and indirect light.

Two different designs allow you to either opt for clean lines in a soothing setting or either go for a design statement by choosing Super-Oh! Slim with an integrated powerbox. Apart from its functionality, the integrated powerbox acts as a rebel element, disrupting the perfect geometrical circle of light and adding a peculiar touch to the project.

# SUPERLOOP

A luminaire can be more than light alone. It can be functional, it can be decorative, it can be an eye catcher. This family not only exists out of circles of light, it also brings circular and squared low voltage solutions for track lighting, so general and accent lighting can be combined within one family. In this way, Superloop allows you to choose 'functional', by mounting adjustable Spy modules on the round or square shaped base. It allows you to choose 'decorative', by mounting the light emitting circle in a horizontal way, or it allows you to choose 'eye catcher', by carelessly hanging the circle of light vertical, as a statement.

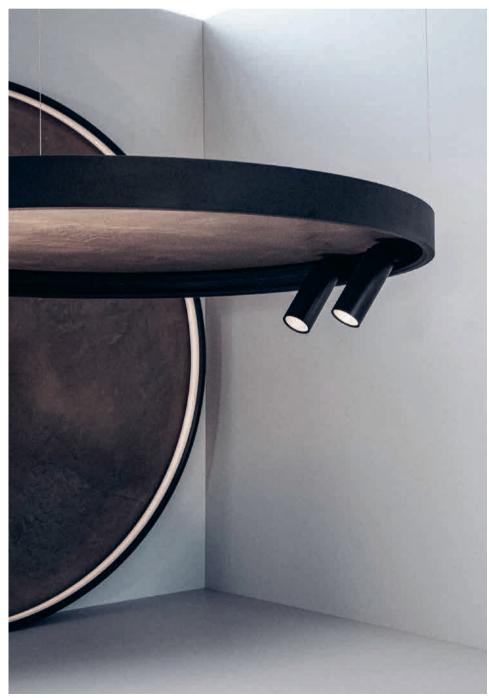

#### SUPERLOOP PLUS

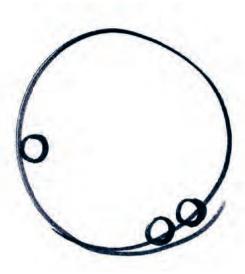

New within the favorite series of Superloop are the horizontal versions with integrated decorative panel on top. The profile has an additional compartment on the upper part which serves to hold a decorative element, be it to add a personal touch, improve acoustics or make a decorative element out of the minimalistic circle. Superloop Plus is available for all Superloop HC versions with a diameter up to 1200mm.

As so you can combine both Superloop SBL as MDL with an additional touch of style, one to offer general lighting and light up the panel, the other one to create accent lighting thanks to the additional spot modules that can be fixed onto the Superloop MDL.

## SOLISCAPE

PATENT PENDING

UNStudio and Delta Light have joined forces to endeavour to improve the wellbeing of people in our rapidly changing work environments, where human health and the war on talent have become a primary focus of employers. Together we are developing a system that facilitates, responds and contributes to solving these complex challenges.

An extremely versatile and flexible system, specifically designed to create human-centric environments.

www.deltalight.com/soliscape

Design by **UNStudio** & Delta Light

UNStudio, founded in 1988 by Ben van Berkel and Caroline Bos, is a Dutch architectural design studio specialising in architecture, interior architecture, product design, urban development and infrastructural projects. The name, UNStudio, stands for United Network Studio, referring to the collaborative nature of the practice.

Throughout over 30 years of international project experience, UNStudio has continually expanded its capabilities through prolonged collaboration with an extended network of international consultants, partners, and advisors across the globe. This network, combined with the centrally located offices in Amsterdam, Shanghai, Hong Kong and Frankfurt, enables UNStudio to work efficiently anywhere in the world. With already 120 built projects in Asia, Europe, and North America, the studio continues to expand its global presence with recent commissions in among others China, South-Korea, Australia, Germany and the UK.

As a network practice, a highly flexible methodological approach has been developed which incorporates parametric designing and collaborations with leading specialists in other disciplines.

The office has worked internationally since its inception and has produced a wide range of work ranging from public buildings, infrastructure, offices, residential, products, to urban masterplans.

Current projects include the mixed-use FOUR development in Frankfurt, the wasl Tower in Dubai and the Southbank by Beulah development in Melbourne. Pivotal realised projects include the Mercedes-Benz Museum in Stuttgart, Arnhem Central Station, Raffles City Hangzhou in China, the Mobius House in the Netherlands and the Erasmus Bridge in Rotterdam.

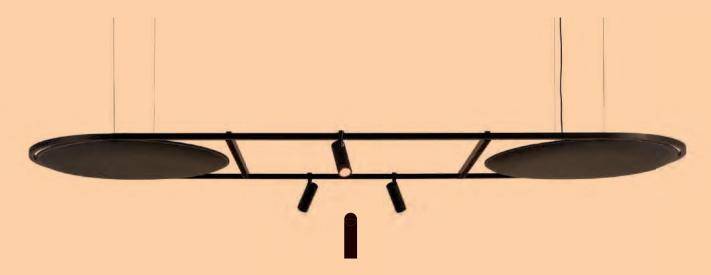

"From architecture to product design and from research to innovation; we always aim to find new ways to design for a better reality, with the user constantly at the center of everything we conceive."

### **BEN VAN BERKEL**Professor AA Dipl. (Hons), (F)RIBA, Hon. FAIA Founder / Principal Architect UNStudio Founder UNSense

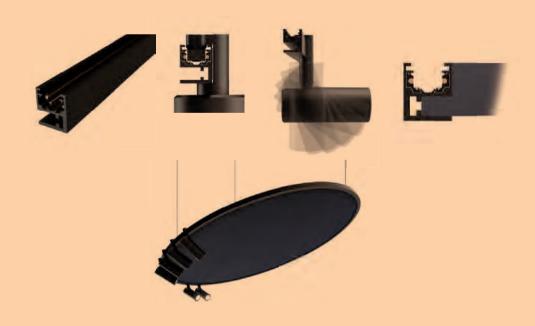

Ben van Berkel studied architecture at the Rietveld Academy in Amsterdam and at the Architectural Association in London, receiving the AA Diploma with Honours in 1987.

In 2018 Ben van Berkel founded UNSense, an Arch Tech company that designs and integrates human-centric tech solutions for the built environment. Ben van Berkel has lectured and taught at many architectural schools around the world. From 2011 to 2018 he held the Kenzo Tange Visiting Professor's Chair at Harvard University Graduate School of Design, where he led a studio on health and architecture. In 2017, Ben van Berkel also gave a TEDx presentation about health and architecture. In addition, he is a member of the Taskforce Team / Advisory Board Construction Industry for the Dutch Ministry of Economic Affairs.

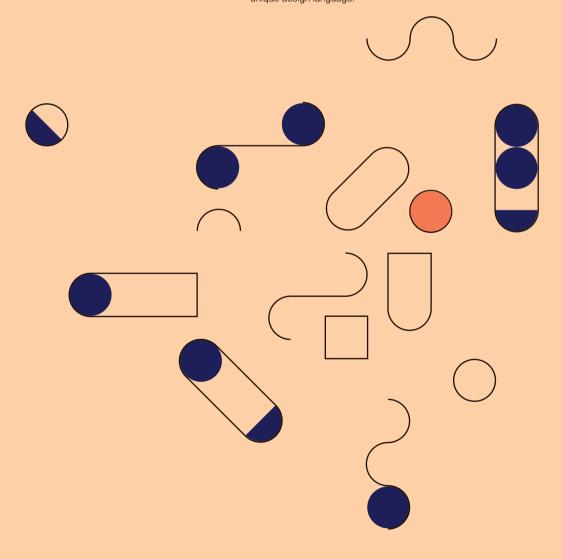

#### **TOOLBOX**

The system is a toolbox of flexible components for architects and designers, that will enable them to create workable and liveable solutions for their projects; a system that combines lighting with acoustics and IOT, into an aesthetically appealing solution that can easily connect to any building management system. The system is also flexible and future-proof, as it allows for new materials and functions to be added in the future.

# ADAPTIVE DESIGN

The intention is to create flexible lightscapes that are responsive to the user's ever-changing needs and activities, where design is no longer imposed by the designers, but guided by the user, resulting in responsive and adaptive design. The system combines miniaturization and personalization, in a unique design language.

## SENSORIAL RESPONSIVE

UNStudio and Delta Light aim to create sensor-based environments that respond, learn and adjust to people's daily activities, taking smart buildings towards responsive architecture through a system that allows people intuitive control and personalisation of space. Soliscape offers different sensoring options enabling you to create human-centric spaces.

Light in function of wellbeing.

### HUMANIZING SPACES

Humanizing spaces involves investigating their behavioural science. We influence the productivity and the wellbeing of users, by allowing a more intuitive control of the space in a scenario based development. The system is about optimizing visual performance with visual comfort and the quality of the environment, responding to multiple contextual variables and activity based actions, upgrading the overall sense of space.

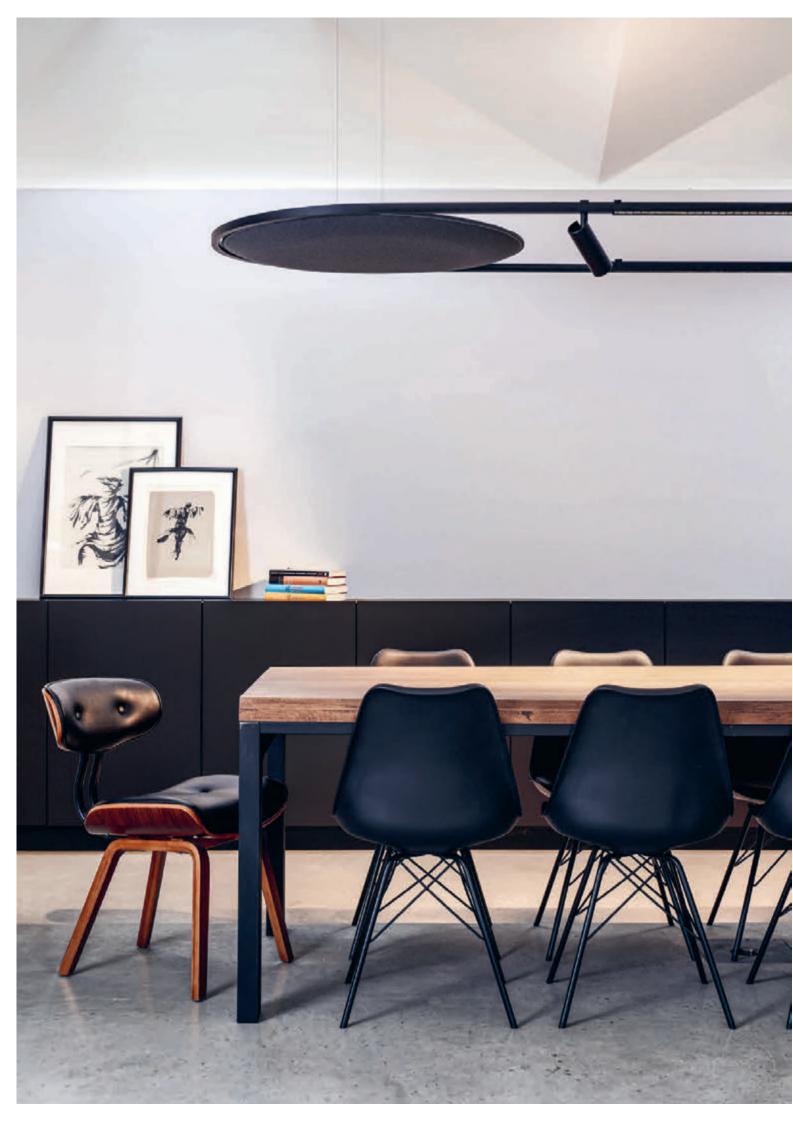

A combination of individual functions in one all-encompassing system, offers a more affordable and efficient tool to work with. Alongside the affordability of the single components, in the service economy, further affordability is created with the scalability of the system, where products tango with services.

## SUSTAINABLE

Lass-Oh! glides through the room as a snake sliding through the greensward, showing off its slim cylindrical contour in combination with the miniature LED clusters hidden inside its body. The variety in shape - straight lines or curved squares and rectangles - in combination with the optional shades make of Lass-Oh! a very decorative lighting solution.

Nevertheless, Lass-Oh! can easily be hung in every residential, retail or office project thanks to its low-glare LED dots that are hidden away into the profile.

#### **INFORM SQ**

#### **PURE MINIMALISM**

Inform SQ breaths refinement in all its aspects. Its slender dimensions of 28 by 28mm weld in seamlessly in any architecture.

By letting the power run over the suspension cables, there is no need for additional supply cables, emphasizing the minimalistic looks of the profile.

The subtle details empower its sublime design: the recessed endcaps with integrated logo, the multiple colour combinations, the design of the powerbox in line with the profile design, all of them adding to the pure minimalism where Inform SQ stands for.

#### HIGH PERFORMER

Despite its minimalistic design, Inform SQ does not compromise on performance.

With a delivered lumen package downwards of up to 3045lm per meter, Inform SQ is perfect for illuminating task areas like office desks or reception counters.

Within the same dimensions one can also opt for a down-up version of Inform SQ, enhancing the sense of space and creating a uniform glow on both vertical as horizontal surfaces, which leads to a reduced contrast and relaxes the eye.

#### **HUMAN IN THE CENTER**

The human aspect is the central topic for Inform SQ. It offers state of the art LEDs that help control the human circadian rhythm via a unique spectrum meant to stimulate activity. The high quality LEDs provide a very natural white colour with a higher amount of energy in the cyan region, helping you to be active during the day and encourage sleep at night.

#### **CHOOSE YOUR CONTROL**

Non Dim / DALI Dim

# -( )H

Its elegant design with multiple colour combinations, its specific sun-mimicking spectrum, its low UGR, its well balanced down-up ratio...we do not exaggerate: Conform is the goddess of office lighting!

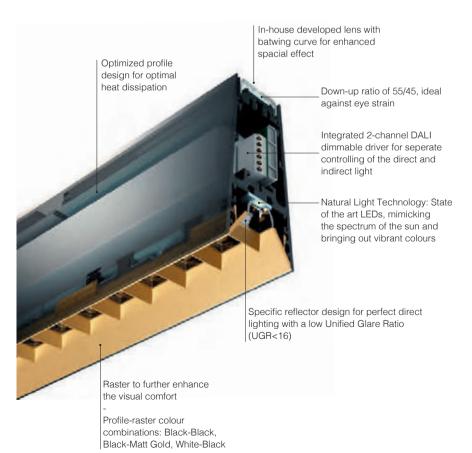

Conform is designed around the light. It not only perfectly embraces the light source, it reinforces it in multiple aspects. Conform uses Delta Light's Natural Light Technology (NLT), state of the art LEDs with a spectrum that very closely matches that of the sun. That includes a broader spectrum, which is preferable for the human eye and brings out the vibrant colours, and an enhanced cyan energy, boosting the human activity.

Design by **DEAN SKIRA** & Delta Light

www.deltalight.com/conform

As so, the LEDs used in Conform help control the human circadian rhythm. To further stimulate the human wellbeing. Conform uses a down-up ratio of 55% to 45%, as a combination of direct and indirect light is recommended against eye strain. Every downwards facing LED is perfectly embraced by specially designed reflectors, resulting in a beam angle of 67° that enlightens the task area but has no direct impact on the eye.

Additionally, the uplight is being spread over the room to enhance the spacial effect and to create a uniform lighting scheme, thanks to the inhouse designed lens extrusion to create a wide batwing beam angle without an intense peak in the centre.

#### LIGHT SOURCE

The Still lamp works as a mobile. This pendant lamp has the particularity of having the light source off-center from its point of suspension, creating an ever-changing elegant dynamic. Due to its big length it dresses and emphasizes a space, without the clutter.

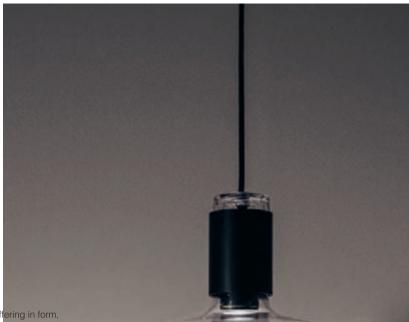

"I always liked to play with counterweights to create movement and tension in my products. With the Still lamp, the rod of metal that creates the balance has the same diameter as the tube welcoming the cable. Screwed together, they create a perfect line and allow easy packing when separated."

Miles is a family of figures differing in form, size and colour, spreading a calm, intimate atmosphere.

The 4 Miles shapes each come in 2 different versions, either with an invisible LED source, or with E27 enabling you to opt for a classic or more expressive bulb.

The Miles shapes are designed to glow in clusters. Hung at various lengths, they create a majestic and sensual centerpiece wherever they are applied. A luxurious installation of clear and colourful glass shades.

A set of decorative tubes in black and gold finishing is available to further upgrade your presentation. These elegant casings add sophistication and style, at the same time distinguishing the magical sphere of the glass from the technical components on top.

All Miles suspensions start from the same ribbed top, with a smooth transition to its four shapes. Each shape has its own unique character, yet every time starting from the same angle, ensuring a harmonious whole when used in a configuration.

Suspended from the ceiling the lamp brings a modernistic style and classic elegance to any décor. You can opt either for a matt lacquered aluminium shade, or the version in mouthblown, soft rounded glass. The variety in sizes, colours and led or E27 versions, allows you to tailor the Mantello to communicate with the style and needs of the room.

A particularly unique version in the Mantello family is the combination of the aluminium housing with the opaque sphere semi-hidden inside the shade. A very stylish combination ensuring a perfectly diffused and warm light effect.

The Soiree range was designed to be voluminous, lightweight and transparent. Its sophisticated form creates a dense and decorative effect, filled with a warm light. The interaction between the pure circular and rectangular forms, with the warm light sources and the symmetric configurations, triggers a dynamic tension. The Soiree takes its inspiration from many angles. From the play of light and shadow in architecture, to natural light effects, the shape of everyday objects and sculptural art. The result is a nest of light, made of circles or rectangles, both structural and decorative, generating a seductive luminous effect. Even when not turned on, they bring texture and character to rooms, defining different areas with small and large contemporary pendants.

The cluster of black circles are in contrast to the classic spherical mood of the inside light source, making the round Soiree a unique object. Either with a bulb or milky-glass light at its centre, the Soiree presents itself like a luminous star wrapped by concentric overlapping orbits. The light adds a warm glow to its sculptural cage, resulting in a unique dégradé effect, peeping through the circles to spread softly into space.

The Soiree is an entire family of versatile suspensions for large or small spaces. Both the round and rectangular versions come in multiple sizes and 2 colours – black or the unique Delta Light Flemish Gold. In both shapes you have the flexibility to choose for a milky-glass sphere at its center, or to opt for an E27 bulb of your preference. The blown glass diffuser in the centre offers subtle nuances thanks to its satin-like finish, in contrast with its more expressive outer cage.

One Soiree suspension makes a bold statement by itself, when combined to form a cluster of pendants it can create a more monumental installation. In any application, the Soiree is ready for different combinations thanks to its multitude in shapes, colours and sizes. Either as a rhythmical counterpoint against a more minimalistic backdrop, or in a repetitive set-up above a long counter or room of tables... The Soiree enhances rooms with its unique character, making both residential and commercial settings a bit more magical.

### ZOOVER

Zoover pretends to be heavy seen its size, nevertheless it looks very lightweight when hung into the room. Designed as a shallow dome, Zoover hides away a circle of light, giving it different looks depending on the point of view. Looking at it from aside, the thermoformed shell has a very neutral appearance. Only when lowering the viewpoint, more and more details catch the eye, as the diffuse light illuminates the inner textures of the scallop. Available in two sizes and two colours for the shade, Zoover adds volume, depth and texture to the room.

ARCHITECT BADR 5

Forty-5 is a wall-mounted architectural eye-catcher. It is hard to describe this light fitting either in words or in images. Call it the three dimensional development of a cube on paper: from reality to abstraction and back. A cube on paper consists of two overlapping squares, with the corners joined by four lines at 45 degrees; hence the name.

Forty-5 puts the observer to the test and gives a playful touch to the wall. Ideal in the home or as a background for receptions and entrance halls. The fitting is available in two versions each forming the mirror image of the other. Add an extra dimension with installations that play with a downlighter and an uplighter.

Available in white finish, both LED light source and driver are integrated and hidden inside the fitting.

### ORBIT

As a Design Plus Award winner in 2000, the Orbit has been a favorite in the wall mounted range of Delta Light for many years. This wall mounted family comes in two versions, Orbit, and Orbit T. Orbit combines a couple of LEDs with a lens for up- and downlight, which results in a distinctive light pattern on the wall. Finished in either standard lacquered finish or with the typical Punk look. Orbit T is a unique, see-through luminaire. The flexible LED around the hollows inside of the luminaire also results in a pleasant down-up light effect.

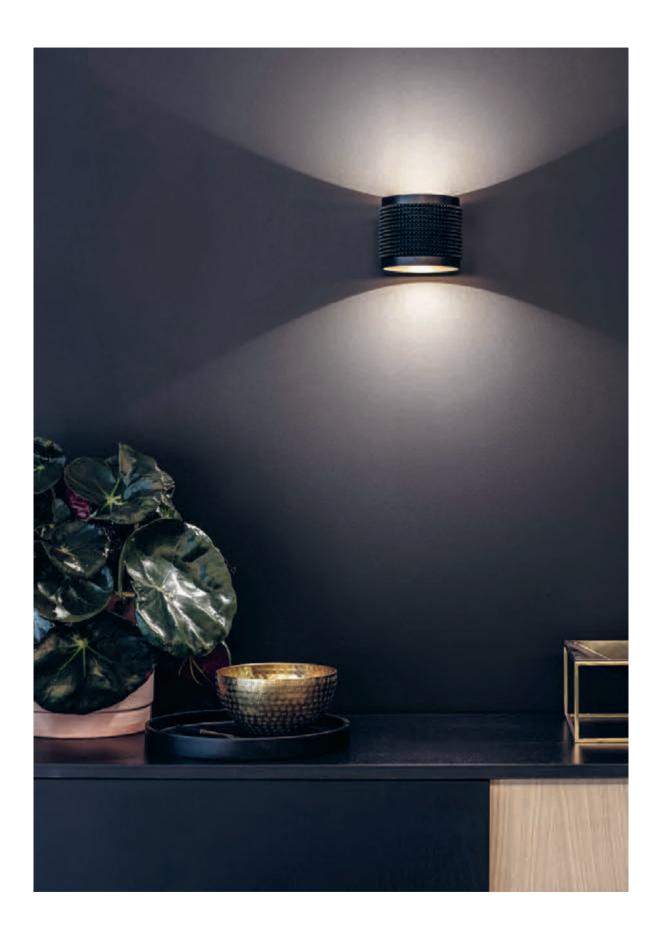

www.deltalight.com/orbit

# HEDRAW Hedra adds refinement, finesse and colour to the range. Next to black and white, Hedra W is available in a Gold Coloured and Black Bronze finish. The faceted design of the Hedra captures and reflects the ambient light with an ever-changing look as result. It is the typical design element of the Hedra family, which also includes a series of pendant and spotlight luminaires. www.deltalight.com/vizir-hedra

## WANT-IT

Want-it is a vivid range of wall luminaires, available for both interior and exterior use. The streamlined and timeless design of the Want-it gives it a very flat and low-impact appearance, with no visible screws. The slightly curved edges provide a subtle twist to the design, while also creating a nicely delineated light pattern on the wall.

The Want-it comes in a square and rectangular shape. While the exterior version comes in a dark grey finish, the interior version is available in all white or a more decorative black and matt gold combination.

ARCHITECT SALGADA RESTREPO / INTERIOR DESIGN CAMILO SALGADO - HECHIZOO

In many ways, Backspace II is a joy for the eye, be it by its slender design, by its pleasant light effect or by its playful colour combinations. Backspace II is designed to create a 2-way light effect on the wall, the choice to install it in a horizontal or vertical way is up to you.

By mounting the light source in the front part of the luminaire, it is perfectly shielded from looking directly into the source.

Backspace II can be used for interior lighting in a white, grey or dark grey finish or for outdoor settings in grey or dark grey. An additional touch of colour can be added to the luminaires by opting for an extra golden reflector.

### TRACK

Minimalism, functionality and versatility are the key terms to describe this extensive collection. The Spy was designed to meet multiple lighting requirements, an ideal solution for accent lighting in residential, hospitality or commercial spaces. The range features low to high lumen packages, narrow to wide beam options, standard or specific LED colours, recessed to surface mounted and track applications, different colour finishes and combinations, and can be equipped with multiple light refining accessories.

Following the constant changes in the world of LEDs and optics and the evolution to better user comfort with more precise optics and better light control, the complete Spy range has been upgraded. The result? Fresh shapes and additional finishing colours, better light comfort through hybrid optics, improved LED colour consistency and new perspectives with Tunable White and Soft Dim.

The renewed Spy family comes in diameters of 27, 39, 52, 66 and 90 millimeters, a range of spotlights to fit any purpose. While the smaller versions come in the lively colours Flemish Bronze, Flemish Gold and Gold Coloured, the bigger Spy's offer Tunable White and Soft Dim solutions in multiple beam angles.

On track, Spy is available in diameters of 52, 66 or 90 millimeters, ranging from 1500 up to 4600lm for several lighting purposes. For specific project demands, Spy offers Soft Dim and Tunable White solutions in different beam angles, ideal to create a particular mood or cosy atmospheres.

With Spy Focus one can opt for different beam angles out of only 1 luminaire, as the circle of light can be widened or narrowed by rotating the front of the fittings' body. As such, every beam angle between 8° and 43° is possible.

For Spy 90 on track, the possibility of an adjustable beam angle within 1 luminaire is taken to a higher level. The technology inside LensVector's dynamic beam shaping lenses allow for a wireless adjustment of the beam angle. One can easily adjust the beam angle and the light intensity of these luminaires using CTRL Delta, as dimming of the luminaire and controlling of the beam angle can be done with all smart devices.

#### LED CASET TECHNOLOGY

Fragma is based on Delta Light's LED Caset technology, which combines multiple LEDs with individual collimator lenses per LED to generate a clean-cut light distribution.

The individual lenses create a multi-layered light distribution to generate a 8° superspot or 14° beam angle as standard. Be it for the smaller version or the high-power Fragma, by concentrating the lenses together, the light distribution will be the same thanks to the multi-layering process.

#### DIMMING

Our Fragma luminaires can be used for simple switch on-switch off settings, but also come in different dimmable versions, be it 1-10V, DALI, with on-board potentiometer or even wireless.

1-10V dimmable Fragma spots allow for simple group dimming on track level, while our other dimmable versions can be used for individual dimming per spot. This going from

individual handset dimming with the on-board potentiometer version, over the DALI addressable version controlled by a DALI master, till the wireless version based on CTRL Delta, offering solutions for both small and big installations. All Fragma versions require a 3 phase track. However our wireless and on-board dimmable

Fragma spots do not need additional dimming wiring within the 3 phase track and in this way offer an easier approach on flexible and individual dimming.

#### **VISUAL WELLBEING**

Light is not only about light effects, it also affects the well-being of the passer-by. Good light quality is of main importance, as it influences the passer-by in an indirect way. CRI 90, good Colour Over Angle uniformity and uniform luminance on the emitting surface are some of the characteristics that let Fragma excel in light quality. In a direct way, the passer-by is influenced by the light when directly looking into the light source. To reduce the direct impact on the passer-by, Fragma offers multiple accessories to further improve its visual comfort.

# MULTINOVA

Multinova has something familiar and something fresh at the same time. As a disc of light, Nova refers to the Supernova range, as both families share similarities in looks and ways of installation. But Multinova has some additional features to make it multi-applicable, hence Multi in the name.

With 2 different diameters, a down and down-up version and a limited height of only 69mm, Multinova is perfect to use in different ways. Its small dimensions fit in any residential or hospitality project, as a track mounted luminaire it suits any retail environment and with a prismatic sheet for reduced glare it even adapts in office settings.

Moreover, Multinova can be used on our Magnetic profiles for general lighting.

Multinova comes in our standard black or white and can also be finished in the warmer Gold Coloured to enrich its surroundings. To top it off – next to a sandblasted or prismatic optic – one can opt for a smoked sheet at the front for a more decorative touch. When turned on the disc is fully lit, when turned off a deep dark arises, ideal in combination with a Gold Coloured Multinova

www.deltalight.com/multinova-track

With its 25cm or 39cm diameter, the Super-Oh XS can be considered as the "little one" of the Super-Oh! family. With only 5cm height, this perfectly curved circle holds a polycarbonate, hiding a cluster of powerleds, specially designed to guarantee a uniform and perfectly balanced light output resulting in a very enjoyable diffuse lighting effect.

Its flexible pivot bracket enables the user to tilt the disc up to 45° and rotate 360°. Super-Oh XS is also available for direct mounting or as a pendant.

# SPLITLINE M52

One catchphrase could best describe the Splitline M52: Flexibility at its best! Apart from protruding spots and pendant modules, this wider profile also allows for adjustable spot modules to be hidden inside the black line in the ceiling, resulting in a serene setting of the room. Similar to Splitline M20, all modules can be toolfree installed and repositioned into the profile thanks to their magnetic fixation, allowing the end user to adapt the light according to the setting of the room.

# SHIFTLINE M26L/MATRIX

Shiftline M26 L is the surface mounted variant of Splitline M20, ideal when recessed mounting is not an option.

Spy, Vizir and Hedra modules - in different sizes and lumen packages - can be combined with Tweeter modules, linear LED lighting or pendant modules as Microspy 39 C or Gibbo, giving you loads of possibilities to create your own ideal lighting scene. Do not worry if you overlooked something in this ideal lighting scene, as all modules can be easily switched from position thanks to their magnetic fixation.

# SHIFTLINE M26H

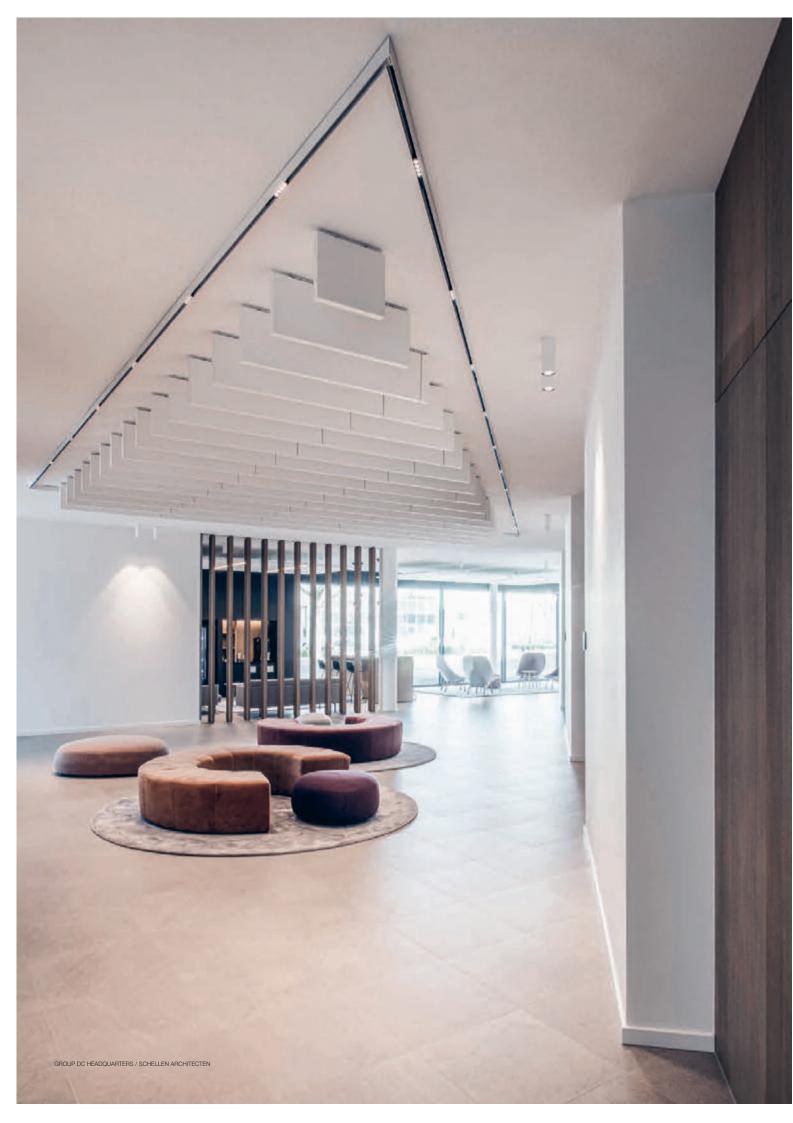

The higher version of our Shiftline M26 creates extra possibilities in terms of functionality, as the profile allows to combine modules for direct lighting with linear modules for indirect lighting, a perfect way to enhance the spacial feeling of the room.

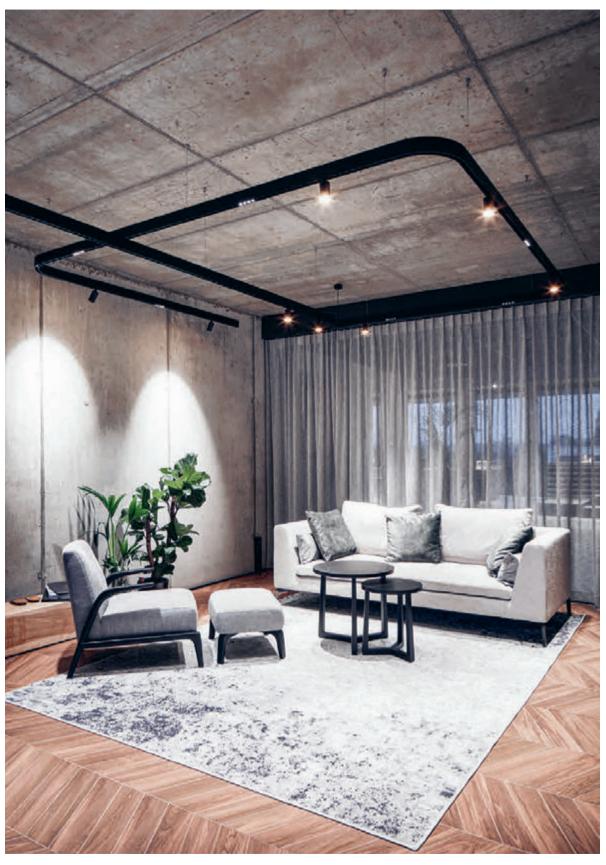

To break the linearity of the Shiftline M26 H, 2 curved corners are available to go from a straight lighting pattern to a free-form lighting set-up. The bends of 90° and 135° allow you to create the set-up of your decires.

# SHIFTLINE 19

Building on the flexibility of our Superloop, adding the refinement of our 2F track and shrinking down the design to the level of our Shelfline. The result? Shiftline 19! This miniature profile lets you combine accent lighting and decorative lighting in the shape of Uho, Spy 27 and Spy 39.

Containing 2 48V and 2 Dim conductors for individual DALI Dimming, the slender profile can easily be combined with Smart 48 and CTRL Delta to offer a quick and easy, minimalistic, wireless lighting set-up.

Shiftline 19 has many application possibilities, as it Dimensions are reduced to a minimum which allow a surface mounted installation that only requires a minimum of space. Be it in residential, hospitality or in retail, the different modules to apply on the Shiftline 19 track can be used for accent lighting or decorative lighting, offering multiple ways of flexibility.

### SPLIT-IT

The Split-it made-to-measure lighting system integrates seamlessly with architecture and demonstrates that form and functionality of lighting have definitely gone down a new path, opening new ways to integrate "lighting paths" with architecture.

The Split-it Pro is a single profile which can be used on its own, or in combination of two. When used as a single profile the Split-it concept can be used parallel with the wall. In a double set-up the Split-It Pro enables you to create a linear setting with Dimensions of your choice. The Pro version enables integration of edgeless lighting paths, either vertically or horizontally. Its 37° degree sharp edge gives walls and ceilings a 'paper-thin' appearance, with no visible wires and no shadow gaps, upgrading the level of architectural detail. It offers not only new ways to give shape to any lighting need, it also gives the possibility to integrate other engineering and technological necessities.

With its linear geometry the Split-it Pro enables you to define spaces and create volumes, to show direction, frame the room and add sharp edged detail to your architecture. It can be combined with a multitude of spots available for specific and demanding lighting needs, ranging up to 2000lm and offering multiple beam optics. All tools are available to meet the specific needs of your project.

### TAGLINE

The Tagline made-to-measure profile provides an ultraminimalistic light line that integrates seamlessly with the architectural lines of your project. Limited to only 7mm the Tagline seems almost invisible, a slender line of light that cuts through

Available in different application versions - from trimless recessed to surface mounted, as a pendant solution or as perimeter lighting - Tagline is offered as a creative tool for architects and designers to accentuate architectural detail or characterise environments. Any space becomes distinctively elegant when the Tagline is used in a simple linear way, or can become very magical and unique when used in a composition.

### TAGLINE TR / TRW

The ultra-minimalistic solution within the Tagline range, as these profiles are seamlessly installed into the ceiling, without any visible trim. While Tagline TR can be used to combine general linear lighting with Spy 27 spot modules for accent lighting, Tagline TRW is ideal to contour the perimeter of the room, as it integrates perfect in between corners where ceiling and wall interact.

### TAGLINE ST / ON

Tagline ST and Tagline On have a little bit more body to it, as these will always have a visible trim. Different from Tagline TR, these versions only offer continuous lines of light for general lighting, be it recessed, surface mounted or suspended.

# FAMILY

The range of Femtoline profiles is very extensive, with each family member having its own specific design and application area. Small or wider profile design, down or down-up lighting, wall, ceiling or floor mounted, flush or tilted plexi ... the Femtoline family offers a solution to any lighting problem.

www.deltalight.com/femtoline-profile

## FEMTOLINE 25

The smallest of the range for surface mounted lighting solutions. Femtoline 25 offers 3 ways of general lighting: standard with a semi-recessed plexi that creates both direct and indirect lighting, Femtoline 25 F with a flush plexi for direct lighting and Femtoline 25 T with a tilted plexi to create an asymmetric light effect.

### FEMTOLINE 35 WALLGRAZER

The in-house developed lens extrusion is designed to fulfill multiple functionalities to create the optimal grazing effect. First of all, its specific shape generates a double light effect: in one direction it produces a small light beam to graze along the surface, even for higher walls, in the other direction the purpose is to widen the beam to obtain the same effect as wide as possible. Its second task is to do all of this without loosing sight of the visual perception. Thanks to a special treatment of the lens, the LED dots of the LEDflex are being transformed into a uniform line of light without any obtrusive effect to the eye.

# MICROLINE

A series of slim, made-to-measure LED profiles which stand out for their versatility and clean-cut design. The Microline profiles are designed to create uninterrupted lines of light, ideal to accentuate architectural lines or be used as general lighting.

#### MICROLINE TR

The Microline Trimless profiles are the perfect solution for cove lighting. The ability to create lines, internal and external corners allows the designer to draw all perimeters of the room, even those with the most expressive geometrics. An invisible light effect, all without interruption.

#### MICROLINE 40/60

The Microline 40/60 profile was created as a high efficiency replacement for the original 30/50 profile. The high-output led array is available with a dimmable power supply with 151lm/W and as a non-dimmable version delivering 167lm/W. In addition, the 40+ features a protruding polycarbonate for extra wide light output.

569

The made-to-measure Streamliner is a very versatile LED-focused profile family. Its multiple installation options combined with the possibility to add spots and downlights, allow Streamliner to be used in various applications. Inside, the LED array is available in 2 different output levels and can be finished with an opal or prismatic cover. The possibility to use Tunable White, emergency modules and sensors further add to the flexibility of Streamliner

Streamliner can be recessed mounted, with (Streamliner 85) or without trim (Streamliner TR), surface or pendant mounted. As a pendant version, the profile can be used with only direct light or there is also the opportunity to have it direct-indirect. To give the profile even more flexibility, also integrated downlighters and additional spots are available.

#### STREAMLINER TR / STREAMLINER 85

Streamliner TR and Streamliner 85 are the recessed solutions within the Streamliner range. Streamliner TR can be finished without any visible trim, while Streamliner 85 has a small trim covering the hole in the ceiling. In both cases a homogenous line of light is all you see, as the profile completely disappears into the ceiling.

Fully lit corners allow you to play around with lines of light, creating unique patters that strengthen the architecture of the building.

#### STREAMLINER 70S / 70L

Streamliner 70S and 70L can be used for surface mounted or suspended applications, both offering the possibility to be used as a direct-indirect or purely direct line of light. With its Dimensions of 70 by 85mm, Streamliner 70S has a more minimalistic look, while Streamliner 70L (70 by 108mm) enables to hide away an emergency unit inside its body.

## REOX

The Reo collection is more than one product, it is a family which offers a solution for many lighting demands, from residential to hotel, restaurant to retail and much more. In line with this philosophy, Reo comes in single and double fixtures, round or square, orientable or fixed, in multiple finishing colours, for both indoor and outdoor use. The design of these recessed conical spots delivers a hardly visible transition from the intense light to the ceiling, resulting in a halo-like effect, ideal to give the space an extra dimension.

DEHULLU ARCHITECTEN

This family offers some miniature fixtures that serve as orientation and atmosphere lighting. Available in round and square, these little dots of light are perfect as guidance lights. While Leds C II can be used indoors for example as safety light in corridors and hallways -, Leds C R ST and Leds Go will guide the way outdoors – along paths and driveways.

# STIP

With Stip, you choose for either a round or square surface mounted wall luminaire for outdoor use. The round one can be used for general lighting, while the square version has an inhouse developed lens that throws the light to both sides, generating a line of light that is ideal to enlighten a pathway.

www.deltalight.com/stip

# SKOV

# LIGHT AS A GUIDE

Skov is perfect as a guidance light, both for in- and outdoors.

The luminaire stands out in slenderness, with only 32mm of thickness for a surface mounted wall application with integrated power supply. The combination of a recessed LED array with the specific design of Skov generates visibility along the path without being obtrusive for the passer-by. The light leaving the luminaire gently falls onto the veil of Skov, revealing a soft light effect to guide you wherever the path may take you.

M2 ARCHITECTURAL GROUP, ALEXANDER ZHIDKOV

In many ways, Backspace II is a joy for the eye, be it by its slender design, by its pleasant light effect or by its playful colour combinations. Backspace II is designed to create a 2-way light effect on the wall, the choice to install it in a horizontal or vertical way is up to you.

By mounting the light source in the front part of the luminaire, it is perfectly shielded from looking directly into the source.

Backspace II can be used for interior lighting in a white, grey or dark grey finish or for outdoor settings in grey or dark grey.

The opal glass version contains a milky, cone shaped core, with a transparent glass surface, creating a pleasantly diffused light that gives the lamp extra cachet.

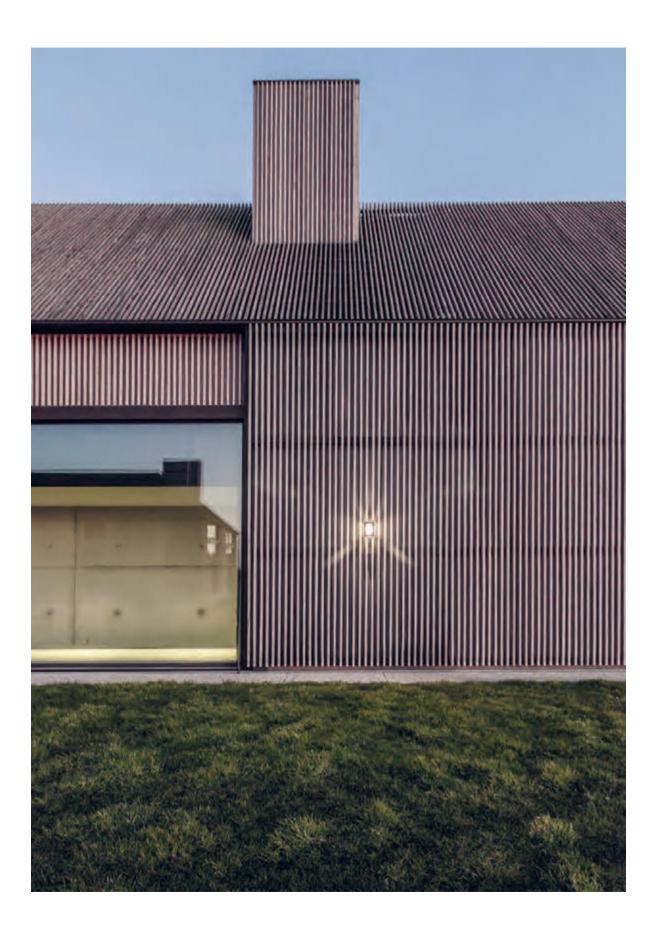

The indoor version of the Montur is also available as an open cube, with one or two bulbs, or in a rectangular shape with a powerful LED cluster concealed behind a protective cover in polycarbonate.

By using them as outdoor fixtures, you can extend your lighting style into the garden or parking area. The outdoor versions are available in the same models as the indoor ones, but always feature a protective cover in glass or polycarbonate. There is also a bollard version, with a choice of various heights.

### LOGIC

Thanks to its multiple reflector options, Logic can be used to accentuate trees or sculptures, to light up facades or large garden features, to create a sense of depth or indicate the right direction along paths and driveways. The choice of installation – trimless or with trim – and its round or square shape allow you to match look & feel with the design of the building.

Within the same family, Logic W can be used as guidance light, built into the wall.

#### www.deltalight.com/logic

#### LOGIC 40

The Logic range stands for a complete family of water and shock resistant lighting fixtures. Logic 40 is the smallest of the family, a minimalistic recessed uplight with a diameter of only 40mm. With its small beam angle of 15°, it perfectly serves as an accent light to highlight any architectural aspect you want. Available with trim or as a trimless installation for an even more minimalistic look. To take care of the visual well-being, Logic 40 either comes with a micro vizor inside or as a Moon version, shielding off the light that is thrown backwards. The perfect addition to accentuate green or sculptures, to highlight façade or small garden features, to create a sense of depth or indicate the right direction along paths and driveways.

#### I OGIC 60

With a diameter of only 60mm, Logic 60 can easily be integrated in any landscape design, without  $\,$ 

disturbing the visual perception of it. Its smallest beam angle is ideal for highlighting, while the wallwash versions emphasize façades and bring depth into the architecture. The specific Moon version cuts of the light spill going backwards, ideal to accentuate trees or reduce the glare for passers-by.

#### LOGIC 90

The bigger version of Logic allows for more choice in beam angles, letting the designer be creative and play with light effect and light intensity. Similar to Logic 60 also wallwash versions are available within the bigger range to offer multiple light effects within the same design language.

#### LOGIC R OK

For optimal beam control, the LED module in Logic R OK can be easily tilted up to 30° and rotated over 350°, while keeping its IP65 label

Flexible, subtle, elegant and powerful: these are the keywords that describe the Kix perfectly. Despite its low-profile appearance, Kix excels in light output and quality, ideal for walkway lighting or other landscape applications. Kix is easy and flexible to use thanks to the adjustable head, designed to provide optimal cooling and eliminate glare.

Kix is available for installation on wall or floor, to strap around a tree or to mount in soft green areas with a pin. In addition to the more robust version of Kix, there is also a S(mall) and M(edium) version available. Kix S combines a powerled with a lens, resulting in a nice 10° light beam. All models have an IP65 rating and are available in alu grey or dark grey.

Light and ambiance is not only for indoors, by combining light and architecture in outdoor settings, the city also remains vibrant at night. With its 7 different light effects and its multiple installation options, Frax has been designed for every aspect of the urban architecture: any form, any material or any composition.

FRAX

www.deltalight.com/frax

OPTICAL PRECISION
LED Caset Technology
Frax is based on Delta Light's LED Caset technology, which combines multiple LEDs with individual collimator lenses per LED to generate a clean-cut light distribution.
The individual lenses create a multi-layered light distribution to

generate a clean 8° or 14° beam angle.

Other beam angles or other light effects are being obtained by adding microlenses in front, sculpting the light into a 26° or 47° beam angle or into a linear or wallwash effect.

#### VISUAL WELL-BEING

Frax not only cares about the perfect light effect, it takes care about the passer-by as well. Frax can be provided with an additional honeycomb or a snoot to reduce the possebility from directly looking into the light source. Both of them reduce any undesired lighteffect and the glare associated

#### **INSTALLATION MADE EASY**

Apart from the extensive optical possibilities, Frax also offers a range of different mounting options. Standard, the luminaire comes on a round base, but one can also opt to install the luminaire head on a pin, on a strap or on a simplified bracket. In this way, Frax can easily be transformed to install in between the greenery, around a tree, a pole or any other surface. To facilitate the installation of multiple Frax luminaires, a degree scale is integrated on the hinge, perfect for precise aiming and a proper repetitive light effect.

## STIG

Playful design combined with a remarkable light effect. The Stig presents itself as a mini robot and distinguishes itself with a narrow line of light. This small helmet hides a 6W to 8W LED, combined with a lens, behind an opal diffuser. The line created with the Stig allows you to accentuate contours, illuminate paths, indicate lanes, or to apply decorative light effects.

The Stig consists of several variants, for direct mounting on ceiling or wall, combined with a pin to put it into the garden, or with a strap for installation around trees, columns or other elements of a building or garden. Small, simple modern and with a special touch.

Outliner defines the perimeter. It comes as single luminaire or as a bespoke profile, perfectly optimizable to any desired length. Designed as an unobtrusive linear solution, Outliner shields off the light source and gently casts its light towards the surface. As such, Outliner is ideal to serve as perimeter lighting across paths, terraces or parking lots, areas that function as passageway.

www.deltalight.com/outliner

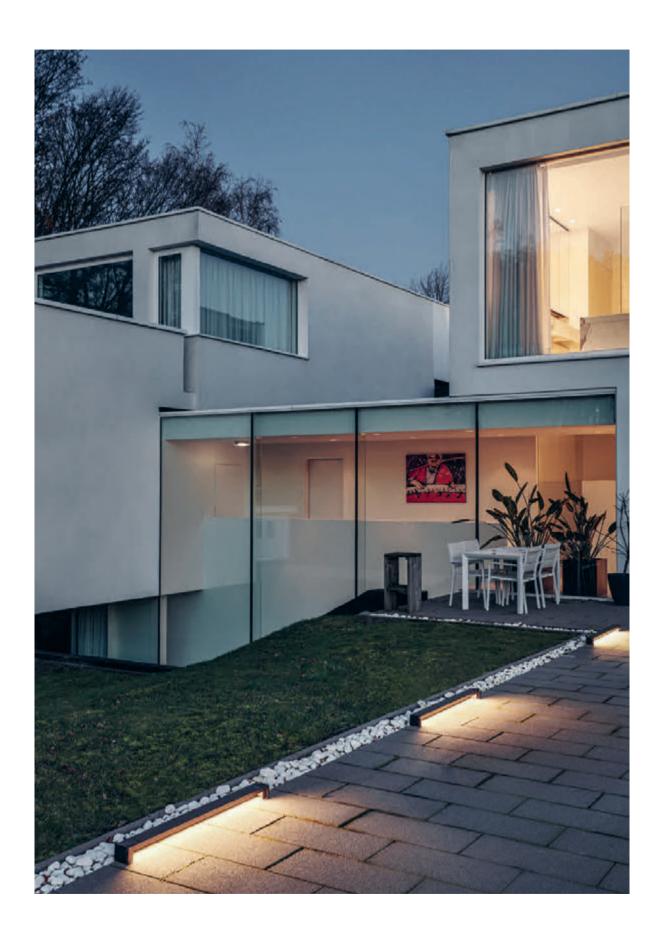

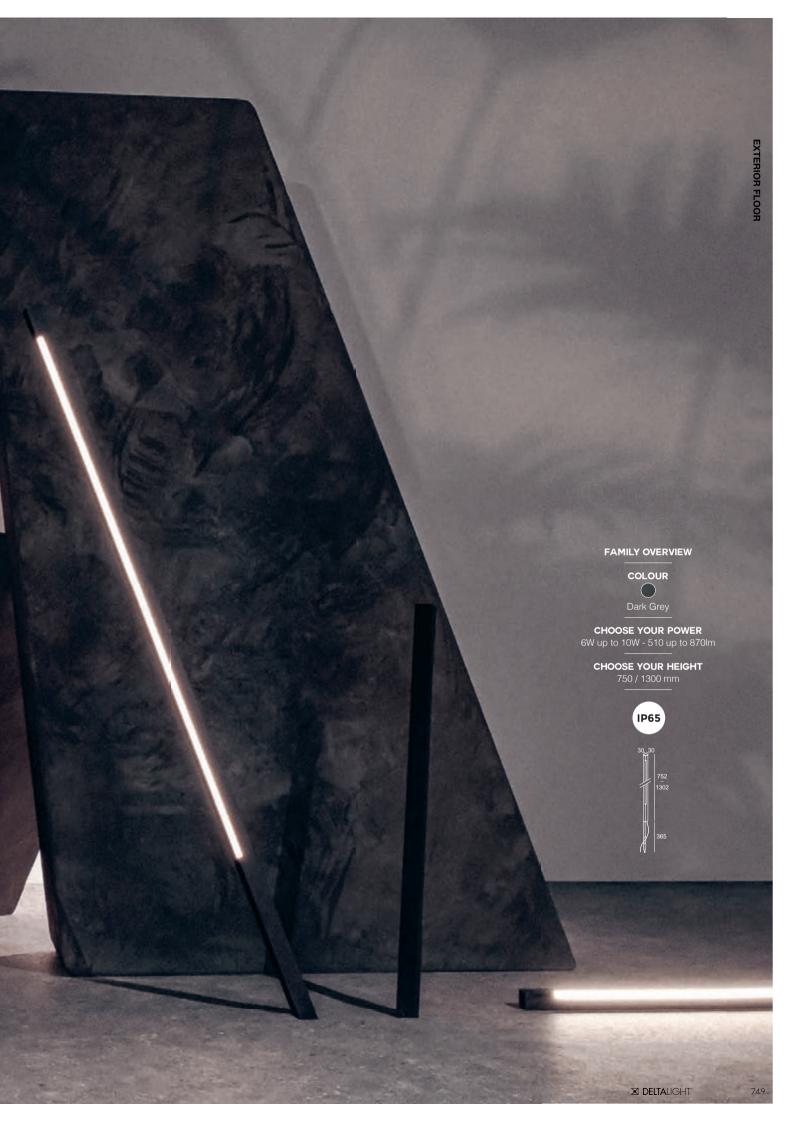

## COLOUR Dark Grey POWER 5,1W - 650lm

# STIEVIE Stievie is not your typical lighting bollard. The sharp pin underneath the luminaire allows you to install it in many different ways, like a spear has been thrown into the lawn. Its linear light generates a pleasant and warm light effect, ideal to light up a sculpture or to guide a way along the light. www.deltalight.com/stievie

ATRIO INTERIORES

Elbo can be used as functional path lighting thanks to the in-house developed optics. The lens solution creates a double effect with a wide general soft glow combined with a narrow delineated beam in the middle. According to the position in the luminaire, it can create a long line of light along a pathway or it can create a linear pattern as the light is thrown forward.

With Montur we offer a highly original interpretation of an archetypical concept: a light source that is contained within the framing of a 3D square or rectangular shape. The Montur is available in indoor and outdoor versions, as a ground, wall or ceiling fixture, with LED clusters or filament-LED lamps with a rustic look. The series integrates beautifully in both country-classic and contemporary homes, and is suitable for hotels and public buildings as well.

The Montur not only breathes new life into a classic concept, it also adds a detailed element of refinement. The sharply profiled framing in aluminium is utterly devoid of welding seams. For both the indoor and outdoor versions, there is a choice of finishing with either hand pressed transparent or opal glass. The opal glass version contains a milky, cone shaped core, with a transparent glass surface, creating a pleasantly diffused light that gives the lamp extra cachet. The indoor version of the Montur is also available as an open cube, with one or two bulbs, or in a rectangular shape with a powerful LED cluster concealed behind a protective cover in polycarbonate. By using them as outdoor fixtures, you can extend your lighting style into the garden or parking area. The outdoor versions are available in the same models as the indoor ones, but always feature a protective cover in glass or polycarbonate. There is also a bollard version, with a choice of various heights.

# POLESANO

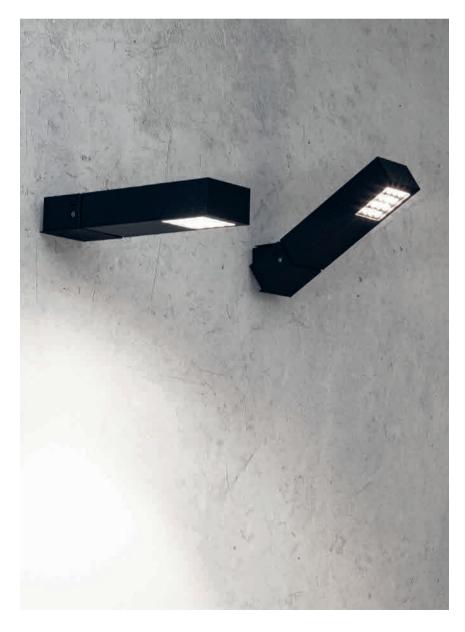

Polesano, a collaboration in product design between Dean Skira and Delta Light. The goal was to develop a new concept in lighting instruments, designed specifically for urban settings, be that a pedestrian pathway, roadway, park, square, façade or landscape. It needed to provide maximum flexibility for the designer to combine different optical characteristics, whilst keeping the same aesthetic for the entire system, regardless of the area.

The result is Polesano, offering modularity and flexibility, and providing personal involvement for the designer to meet specific functional and aesthetical needs of the project. Future developments can be integrating video surveillance, Wi-Fi, speakers or other IoT units

Design by **DEAN SKIRA** & Delta Light

www.deltalight.com/polesano

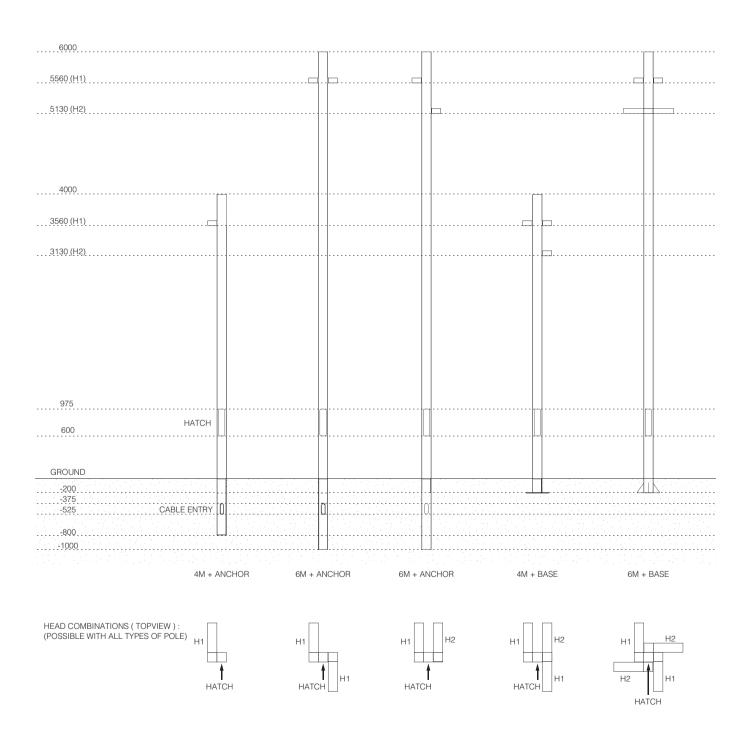

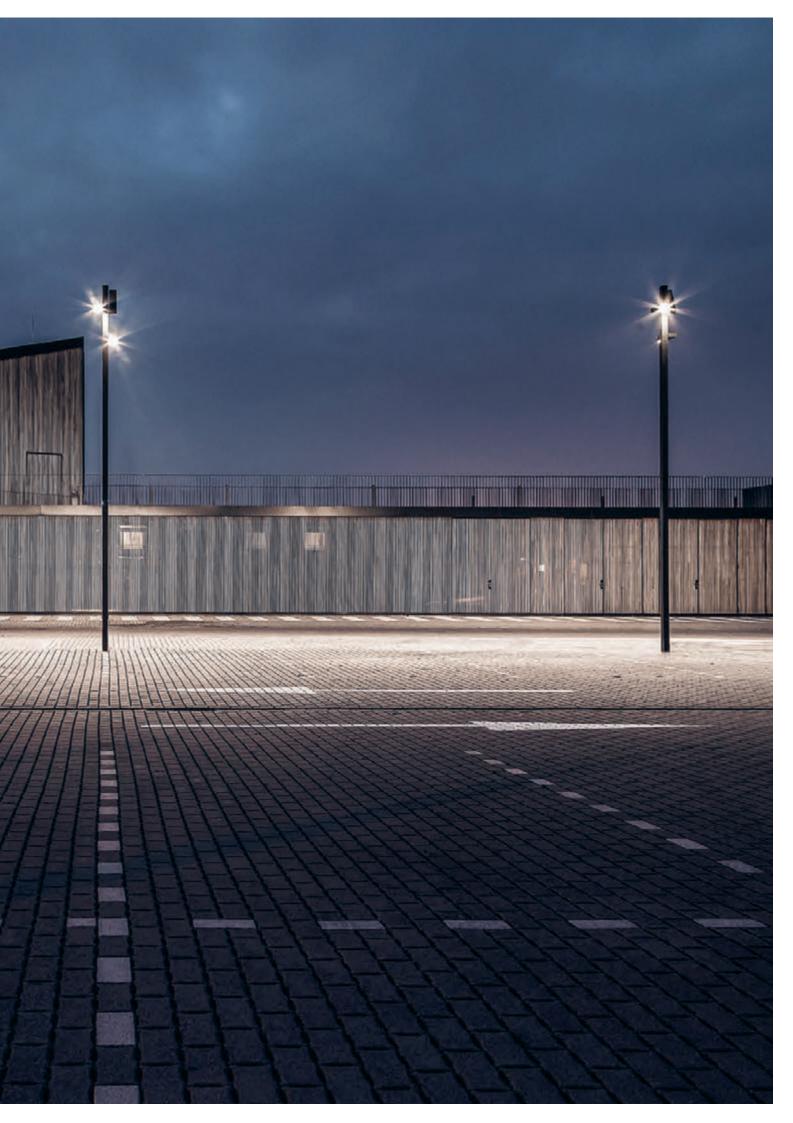

#### STANDARD CONFIGURATIONS

Within the Polesano Range, some standard configurations are offered, both for the pole and the luminaire. A pole height of 4m or 6m can be chosen, either with anchor or base as installation possibilities. Both heights allow you to have up to 4 luminaires to be mounted in standard combinations, as shown below.

## A FAMILY BUSINESS

Delta Light's success is built on the determination, passion, and talent of our global team. We hereby thank all of our colleagues and partners for their invaluable work.

The lighting industry is evolving and growing at very high speed.

As a family run business, we have a personal stake in keeping our clients happy. As such we are committed in making a difference through original designs, outstanding service levels, an eye for detail and personal contact and striving to be the best in all we do.

Our product development process is based on a combination of creativity and technological innovation. It is our mission to present to the world a portfolio of lighting solutions that satisfy people's desires and needs, realise peoples visions, whilst creating a perfect symbiosis between architecture, function and atmosphere.

# THE MAKING OF THE LIGHTING BIBLE

THE LIGHTING BIBLE 14 is entirely created in-house, by a dedicated team, supported by colleagues from all departments. Are you wondering how it all went down? We lift a tip of the veil with this behind-the-scenes footage.

No photographers were harmed during this period.

A special thank you to our coffee machine, who was always there for us.

We were instructed by our Art Director to write a kind thank you note towards him... So here it comes:

Lorem ipsum dolor sit amet, consectetur adipiscing elit.

Donec in justo eu quam ultrices commodo. Vivamus posuere orci congue tortor pellentesque viverra. Pellentesque pharetra, mauris ut consectetur placerat, purus ex feugiat nibh, a commodo velit nibh a lacus. Hebban olla vogala nestas hagunnan hinase hic enda thu hoe mehr vogala hoe betera. Quisque in volutpat nisi, sed tristique mi. Integer ultrices massa nec sapien tristique suscipit. In pellentesque, leo Frituur Magalie fermentum, magna Sammie blandit nulla, a malesuada justo mauris ut tellus.
