FENESTRA 24V

Beam angle: 151°
Mounting: Floor
Lamps description: Power Led: 4W - 274 lm ≠ FIXT 165 lm - 2700K/CRI 80 - 12-24V
Environment: Indoor, Outdoor
Notes: We recommend using a connection system with a degree of protection greater than or equal to the degree of protection of the luminaire.

Technical description: Luminaire body in die-cast aluminum EN AB-47100 (low copper content). High-resistance coating: after a sandblasting treatment of all components to make the surface porous and ensure a greater adhesion of the paint, the external coating is applied with a double layer with epoxy powders according to the QUALICOAT standard. The first layer of epoxy powder gives chemical and mechanical resistance, the second finishing layer of polyester powder ensures resistance to UV rays and atmospheric agents. The painted surfaces are treated with alkaline and acidic washes, then rinsed with demineralized water, subjected to a chemical conversion treatment to protect against oxidation. Thanks to the use of a dual LED source and two laminar emitting lenses, it guarantees a coverage of 270° with homogeneous distribution and excellent color uniformity. UV-stabilized polycarbonate diffuser, silicone seal. Each luminaire is equipped with a mechanical adjustment system to compensate for the inclination of the sills, and to allow the correct orientation of the luminous beam.

Fenestra 24V
designed by FLOS Outdoor
Luminaire for outdoor use for installation in a window compartment with LED light source. 24V power source not included. Possible to use standard 12V power supply. Equipped with a 1000 mm section of outgoing neoprene cable.
